## Explanation of the Articles in the Calendar.

Standard times* are given in all columns headed Toronto, Quebec, and Winnipeg.

The times* of the SUN'S RISING AND SETTING† are given for the upper limb, and are corrected for refraction for Toronto, Quebec and Winnipeg.

The standard times* both for the rising and setting of the Moon's centre are given for every day for Toronto, Quebec and Winnipeg.

The column, SUN ON MERIDIAN, gives the time that a watch keeping local mean time should show when the shadow of a sun dial is on the noon mark.

MOON'S AGE.—This column shows to the nearest tenth of a day the Moon's age at Toronto mean noon.

The column, UPPER TRANSIT OF POLE STAR, shows for every day the mean time* at which the Pole Star makes its upper transit across the meridian of longitude 4h. 46m. W. It passes the meridian twice on October 13th.

The time at which the lower transit of the Pole Star occurs may be found by adding 11h. 58m. 2s. to the time of the preceding upper transit.

The column, TRANSIT OF FIRST POINT OF ARIES, shows for every day the meantime* at which the FIRST POINT OF ARIES passes the meridian of longitude 4h. 46m. W. (71° 30′), and for any other meridian a correction of 0.655 secs. per degree will have to be applied minus for longitudes west of the 71° 30′, and plus for east. This column is put in especially to be used in connection with the Tables for Time and Azimuth of Polaris when vertical with certain other stars.

GREATEST ELONGATION OF THE POLE STAR.—This column gives the greatest Azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 42°, with the corresponding corrections, which are additive, for latitudes up to 65°. (See pages 33 and 34.)

From the time of the upper transit of the Pole Star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table. These constants are calculated for declination 88° 47′ 34″. The maximum error in the use of this Table will not exceed 3 secs. in the higher latitudes, and proportionately less for the lower latitudes.

MOON'S PHASES.—This Table gives the times (standard 75th meridian)* when the Moon passes the geocentric longitudes of 0°, 90°, 180°, and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

*In the present Almanac the hours are numbered from 0 (midnight) to 23.

†Although these times are calculated for Toronto, Quebec and Winnipeg only the standard times at other places not differing much from them in latitude may be obtained with sufficient accuracy for ordinary purposes by adding four minutes for every degree west, and subtracting four minutes for every degree east of these places.

## Star Table.

From the times of the transit of the *First Point of Aries* may be derived, with the aid of the following table, the approximate times of culmination, and of the rising and setting of the principal fixed stars, as seen from the parallel of 45° north latitude.

To ascertain when any star found in the following Table will be on the meridian, *add* the number in the left-hand column of figures to the transit of the *First Point of Aries* for the given day in the calendar. If the result exceeds 24 hours, *subtract* 23h. 56m. To find the time of *rising* of a star, *subtract* the number opposite to it in the right-hand column of figures from the time of its meridian passage. For the *setting* of a star, *add* the same number to the time of its meridian passage. The stars marked (....) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 45°.

*Example.*—Find the time of culmination, rising and setting of α Aquilæ (Altair) September 28th, 1903.

| | h. | m. |
|---|---|---|
| Transit of 1st Point of Aries (from Calendar) | 23 | 33 |
| From Star Table add | 19 | 43 |
| | 43 | 16 |
| Subtract | 23 | 56 |
| *Local Mean Time* of Meridian passage | 19 | 20 |

19h. 20m. − 6h. 34m. = 12h. 46m., Time of *Rising*.
19h. 20m. + 6h. 34m. = 25h. 54m. (1h. 54m. next day), Time of *Setting*.

## Eclipses.

In the year 1903 there will be four eclipses, two of the sun and two of the moon:

I.—An annular eclipse of the sun, 1903, March 28th. This eclipse will be visible as a partial eclipse in the Yukon District and part of British Columbia. The eclipse will begin at Dawson City 16h. 48m., 135th meridian time, or 4h. 30m. p.m. local mean time. The greatest obscuration takes place at 17h. 53m., 135th meridian time, or 5h. 35m. p.m. local mean time. The magnitude of the eclipse will be 0.76 (sun's diameter = 1.0).

II.—A partial eclipse of the moon, 1903, April 11th; partly visible in Canada.

| Moon leaves penumbra | 11 | 21 | 59.8 | |

Magnitude of the eclipse 0.973 (moon's diameter = 1.0).

III.—A total eclipse of the sun, 1903, Sept. 20th; invisible in Canada.

IV.—A partial eclipse of the moon, 1903, October 6th; invisible in Canada.

**The Dominion of Canada** has an area of about 3,315,647 square miles, or, including its water surface, 3,456,383 square miles, is about 3,500 miles from east to west and 1,400 miles from north to south, and consists of the provinces of Ontario and Quebec (formerly Upper and Lower Canada), Nova Scotia, New Brunswick, Manitoba, British Columbia, Prince Edward Island and the North-west Territories (which latter contain the vast territory formerly under the control of the Hudson's Bay Company). It therefore comprises the whole of the northern half of North America, with the exception of the United States Territory of Alaska on the west, and Labrador, which is under the control of the Government of Newfoundland, on the east. It is bounded on the north by the Arctic Ocean, on the west by the Territory of Alaska and the Pacific Ocean, on the south by the United States, and on the east by the Atlantic Ocean.

# AZIMUTH OF "POLARIS" AND LOCAL MEAN TIME.

By F. L. Blake, O.L.S. & D.L.S. (*Astronomical Officer, Observatory, Toronto*).

These Tables are for finding the *Azimuth* of *Polaris* and the *Local Mean Time* (not Standard time) when in the same *Vertical Circle* with certain bright stars to be observed during the evening between sunset and midnight.

The arrangement of the tables has been considerably altered from that of last year. Six stars have been selected suitable for TIME purposes, namely, β Orionis *(Rigel)*, α Leonis *(Altair)* α Virginis *(Spica)*, α Serpentis, α Aquilæ *(Altair)* and α Aquarii. The remaining fourteen stars are for *azimuth* only.

To obtain the *Azimuth of Polaris* a certain logarithm is tabulated called Log. B., and is to be used in the following azimuth formulæ: Cotang. Az. = Cos. Lat. B.

The azimuth thus obtained will have to be corrected for time interval between the sighting on *Polaris* and the passage of the Star across the vertical line. This correction is obtained by multiplying the seconds of time interval by the decimal in column *a*.

The *Local Mean Time* is obtained by using the column under the heading TIME in conjunction with the *Transit* of the *First Point* of *Aries* over the meridian of longitude, $4^h$ $46^m$ or 71° 30′ W., and for any other meridian the tabulated *Transit* of *First Point* of *Aries* should receive a correction of 0.655 secs. for each degree of longitude differing from 71° 30′. *Subtractive* when the place of observation is *West* and additive *East*.

A method of taking the observation would be as follows: A short time before the *Local Mean Time* of passage of the selected Star (this time should be obtained from the Star table given on page 14) have the instrument set up, well levelled and the collimation error reduced to zero. Sight on *Polaris*, clamp the azimuth plate and turn the telescope over to the other star and wait till it appears in the field of view. Then turn back again to *Polaris* and bisect accurately by means of the tangent screw, note the time and again turn over to the other Star and take the time of its passage over the wires.

Either before or after this observation the *Latitude* may be very easily obtained from the Latitude Tables which follow by sighting on *Polaris*, noting the time and reading the altitude circle.

By means of these tables the *Time*, *Latitude* and *Azimuth* of *Polaris* may be obtained in a very short time.

### EXPLANATION OF TABLES.

The column *a*, Decimals of a second in *Azimuth* for each second of time interval.
" *t*, " " in *Time* " " "
" TIME. The time to be applied to the *Transit* of the *First Point* of *Aries* for the day of observation to obtain the true *Local Mean Time*.
" Log. B. The logarithms used in obtaining the *Azimuth* of *Polaris*.

The *Transit* of the *First Point* of *Aries* will be found in the calendar tabulated for every day of the year for longitude 71° 30′ W. The elevation of the stars are given to help identify it. The altitudes are for latitude 42°.

### EXAMPLE.

Suppose that in latitude 48° 30′ 10″ and longitude 85° 20′ by account on August 11th, 1903, *Polaris* was observed at watch time $22^h$ $29^m$ $5^s$ and α Aquilæ *(Altair)* in the same vertical at $22^h$ $32^m$ $10^s$, giving a time interval of 185 seconds. Required the watch error and Azimuth of Polaris.

### FIRST TO FIND THE WATCH ERROR.

To find *Transit* of *First Point* of *Aries* over 85° 20′ longitude.

Longitude.....85° 20′
Constant longitude..... 71 30

Difference..... 13 50 west (subtractive).

| | h. | m. | s. |
|---|---|---|---|
| Correction for 13° 50′ = 13.83 × 0.655 secs. | = − 0 | 0 | 9.1 |
| August 11th Transit 1st point of Aries (from calendar) | = 2 | 45 | 38.0 |
| Corrected transit to he used | = 2 | 45 | 28.9 |
| TIME from Tahles for Latitude 48° 30′ 10″ | = +19 | 47 | 34.7 |
| Local mean time | = 22 | 33 | 3.6 |
| Watch time | = 22 | 32 | 10 |

Watch slow..... 54 secs.

The time interval correction for this observation is neglected, heing so small.

### AZIMUTH.

Log. Cotang. Az. = Log. Cosine Lat. + Log. B. for date.

| | | |
|---|---|---|
| Log. B. for Aug. 11th | = | 1.67610 |
| Log. Cos. Lat. 48° 30′ 10″ | = | 9.82124 |
| Log. Cotang. Az. | = | 11.49734 |
| Az. | = | 1° 49′ 21″ |
| Time interval correction .03 × 185 secs. | = + | 6 |
| Corrected Azimuth | = | 1° 49′ 27″ East. |

2nd Example.—Suppose on Nov. 10th, 1903, Polaris was observed at $18^h$ $45^m$ and ε Ursæ Majoris *(Alioth)* in the same vertical at $18^h$ $48^m$ $32^s$ in Latitude 55° 31′. Required the Azimuth of Polaris. Time interval 212 secs.

| | | |
|---|---|---|
| Log. B. for Nov. 10th | = | 2.49914 |
| Log. Cos. Lat. 55° 31′ | = | 9.75294 |
| Log. Cotang. Az | = | 12.25208 |
| Az. | = | 0° 19′ 14″ |
| Time interval correction .535 × 212 secs. | = + | 1 54 |
| Azimuth | = | 0.21.8 East. |

Note.—In taking these observations for Azimuth the true time is not necessary, only the time interval being required.

# STARS IN THE "VERTICAL OF POLARIS," 1903.

For ascertaining the *Local Mean Time* and the *Azimuth of Polaris*. To find the *Azimuth of Polaris* add together the tabulated Log. B. and the Log. Cosine of the latitude. The result is the Log. Cotangent of the Azimuth. If there is a *Time Interval* between the observation on Polaris and the star selected the correction in Column *a* will have to be multiplied by the time interval in seconds and applied.

# STARS IN THE "VERTICAL OF POLARIS," 1903.

For ascertaining the *Local Mean Time* and the *Azimuth of Polaris*. Azimuth formulæ add together Log. B. and the Cosine of the Latitude; the result is the Cotangent of the Azimuth of Polaris. Correct this by applying the correction in Column *a*. This column contains the change in Azimuth of Polaris for one second of time.

The greatest eastern elongation of *Polaris* will occur between sunset and midnight from July 20th to September 20th. The time may be found from the tabulated upper transit in the Almanac or Calendar, and applying the correction contained in the table on page 13. The Azimuth is found in the tables on pages 33 and 34.

# TABLES FOR "LATITUDE" BY AN OBSERVED "ALTITUDE OF POLARIS" AT ANY TIME.

By F. L. Blake, O.L.S. & D.L.S. (*Astronomical Officer, Observatory, Toronto*).

Note the watch time when *Polaris* is observed and correct for watch error.

Reduce the *Observed Altitude* to the *True Altitude* by correcting for index error and refraction.

Next take the *difference* between the *True* watch time and the Almanac time of the *Upper Transit of Polaris* for the given day. (This Almanac time will have to be corrected for any other longitude than 71° 30′ for which it is tabulated by *Adding* 0.655 secs. for every degree *East* and *Subtracting* when the place of observation is *West* of 71° 30′.)

Call this *difference* the *Hour Angle*.

Table I.—With this *Hour Angle* and the *True Altitude* enter Table I. and apply the correction to the *True Altitude* always *additive*.

Table II.—Enter Table II. with the *Hour Angle* and apply the correction with its proper sign.

Table III.—Enter Table III. with the *Date* and *Hour Angle* and apply the correction with the same *sign* as used in Table II.

The result is the *Latitude*.

EXAMPLE.

1903, September 14th at 21h 25m mean time by watch which is 33s fast in longitude 85° 30′ by account suppose the *True Altitude* of *Polaris* to be observed 43° 30′. Required the Latitude.

The correction for an increase of altitude of one inch in the barometer or for a decrease of one degree in the thermometer, is to be added to the *tabular refraction*, but when the barometer is lower than 30 inches, or the thermometer higher than 47°, the corrections become *subtractive*. When great accuracy is required, 0·003 inch should be deducted from the observed height of the barometer for each degree that the thermometer near it is above 50°, and the same quantity added for an equal decrease.

# TIDE TABLES FOR HALIFAX, QUEBEC, AND ST. JOHN, N.B., 1903.

These Tide Tables, with Tidal Differences for other places, are issued by the Tidal Survey Branoh of the Department of Marine and Fisheries of the Dominion of Canada. They are based upon direct observations of the tides, obtained by means of self-registering tide-gauges, which are kept in continuous operation day and night throughout the year. The records are reduced by the latest methods of analysis, and the computation of the tables is made in the Nautical Almanac Office, London.

The Tide Tables for Halifax are based upon the analysis of a record whioh was obtained during the years 1851, 1852, 1860 and 1861, with which there has been inoorporated the record for one full year from the present tide-gauge. The Quebec Tables are now based upon the record for six complete years. The St. John Tables are based upon the record for two complete years.

The Tidal Differences are based upon simultaneous observations taken throughout the St. Lawrence and the Bay of Fundy, in the summer seasons of 1898 and 1900.

The TIME used is Standard Time for the 60th meridian, which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from the level of Low Water at ordinary Spring Tides; that is, from the same datum to which the soundings are referred, on the Admiralty Chart of Halifax harbor.

THE DRY DOCK.—To find the depth of water on the sill of this dock at any tide, *add* 23·4 feet to the height of High Water as above given.

The Time used is Standard Time for the 60th meridian, which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The Height is measured from the level of Low Water at ordinary Spring Tides; that is, from the same datum to which the soundings are referred, on the Admiralty Chart of Halifax Harbor.

The Dry Dock.—To find the depth of water on the sill of this dock at any tide *add* 23·4 feet to the height of High Water as above given.

The TIME used is Standard Time for the 60th meridian, which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from the level of Low Water at ordinary Spring Tides; that is, from the same datum to which the soundings are referred, on the Admiralty Chart of Halifax Harbor.

THE DRY DOCK.—To find the depth of water on the sill of this dock at any tide *add* 23·4 feet to the height of High Water as above given.

# TIDE TABLES, QUEBEC, 1903.

The Time used is Eastern Standard for the 75th meridian, which is five hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The Height is measured from the level of Low Water at ordinary Spring Tides; that is, from the same datum to which the soundings are referred, on the Admiralty Chart of Quebec Harbour.

Levis Dry Dock.—To find the depth of water on the sill of this dock at any tide, *add* 7·7 feet to the height of High Water as above given.

The TIME used is Eastern Standard for the 75th Meridian, which is five hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from the level of Low Water at ordinary Spring Tides; that is, from the same datum to which the soundings are referred, on the Admiralty Chart of Quebec Harbour.

LEVIS DRY DOCK.—To find the depth of water on the sill of this dock at any tide *add* 7·7 feet to the height of High Water as above given.

The TIME used is Standard Time for the 60th Meridian, which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from the level of Low Water at Spring Tides, as ascertained by the tide-gauge observations themselves. (This level is approximately 1·4 feet lower than the datum to which the soundings on the Chart of St. John Harbour are referred, as nearly as this can now be ascertained.)

The TIME used is Standard Time for the 60th Meridian, which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from the level of Low Water at Spring Tides, as ascertained by the tide-gauge observations themselves. (This level is approximately 1·4 feet lower than the datum to which the soundings on the Chart of St. John Harbour are referred, as nearly as this can now be ascertained.)

The Time used is Standard Time for the 60th Meridian, which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The Height is measured from the level of Low Water at Spring Tides as ascertained by the tide-gauge observations themselves. (This level is approximately 1·4 feet lower than the datum to which the soundings on the Chart of St. John Harbour are referred, as nearly as this can now be ascertained.)

## LEGAL WEIGHTS AND MEASURES IN CANADA.

The legal weights and measures of Canada are the Imperial yard, Imperial pound avoirdupois, Imperial gallon (of 277·27384 cubic inches), and the Imperial bushel. The Imperial gallon is equal to 4·54174 litres, while the wine gallon, used in the United States, is equal to 3·785 litres.

By Act 42nd Vic. (1879), Chap. 16 (amended by Chap. 30, Acts of 1898), it is provided: That in contracts for sale and delivery of any of the undermentioned articles, the bushel should be determined by weighing, unless a bushel measure be specially agreed upon, the weight equivalent to a bushel being as follows:—

Wheat, 60 lbs. Indian Corn, 56 lbs. Rye, 56 lbs. Pease, 60 lbs. Barley, 48 lbs. Malt, 36 lbs. Oats, 34 lbs. Beans, 60 lbs. Flax seed*, 56 lbs. Hemp, 44 lbs, Blue grass seed, 14 lbs. Lime‡, 80 lbs. Castor beans, 40 lbs. Potatoes, 60 lbs. Turnips, 60 lbs. Carrots, 60 lbs. Parsnips, 60 lbs. Beets, 60 lbs. Onions†, 50 lbs. Bituminous coal, 70 lbs. Clover seed, 60 lbs. Timothy, 48 lbs. Buckwheat, 48 lbs.

By the same Act the British hundredweight of 112 pounds and the ton of 2,240 pounds were abolished, and the hundredweight was declared to be 100 pounds, and the ton 2,000 pounds avoirdupois, thus assimilating the weights of Canada and the United States.

*Changed from 50 to 56 lbs. by Act of Parliament, 1898.
†Changed from 60 to 50 lbs. by Act of Parliament, 1898,
‡Added by Act of 1898.

## PAR OF EXCHANGE.

In 1707 it was enacted that certain French and Spanish coins should pass as dollars at four to the pound currency, and as four shillings and sixpence sterling, so eighteen shillings sterling became equal to a pound (or twenty shillings) currency, and twenty shillings sterling became equal to $\$4.44\frac{4}{9}$ currency, and $4.44 was known as "par." In 1871 the Federal Parliament made the British sovereign current at $\$4.86\frac{2}{3}$, being $9\frac{1}{2}$ per cent. premium on the old par.

## THE BRITISH CENSUS OF 1901.

The total number of persons returned as living in England and Wales at midnight on Sunday, March 31st, 1901, was 32,526,075. This shows an increase of 3,523,550 upon the number enumerated on April 5th, 1891, and gives a decennial rate of increase of 12·17 per cent., which favourably contrasts with the increase of 3,028,086, or 11·65 per cent. in the previous decennium. The increase is numerically greater than in any previous decennium, but the progression per cent. is lower than in any other decennium of the last century, except those terminating in 1861 and 1891.

Of the 32,526,075 persons enumerated 15,721,728 were males and 16,804,347 females. This gives an excess of 1,082,619 females, an excess which is partially attributable to the fact that men serving in the Army, Navy, and the Merchant Service abroad are excluded from the reckoning. In 1891 the excess was 896,723. To each 100 males enumerated there were 106·9 females. The proportion of females has been steadily increasing at each census since 1851, having been successively 104·2, 105·3, 105·4, 105·5, 106·4, and 106·9 to 100 males.

Inhabited houses number 6,266,496, as contrasted with 5,451,497 in 1891, an increase of 814,999, or 15·0 per cent. For the period ending 1891 the increase had been at the rate of no more than 12·8 per cent.

The population of Scotland was 4,471,957, showing an increase of 446,310 in the 10 years, or 11·1 per cent., against 11,2 and 7·8 per cent. in the two preceding decennia. The excess of births over deaths in the 10 years was 499,768, showing that the loss of population during that period by excess of emigration over immigration was 53,458.

The population of Ireland was 4,456,546, and less by 248,204 than the number recorded at the previous Census in 1891; the decrease, which had been equal to 4·4 and 9·1 per cent. in the two preceding decennia, fell again to 5·3 per cent. in the last intercensal period. The excess of births over deaths in Ireland during the Census period 1891-1901 was equal to 218,222. It follows, therefore, that the loss of population during that period by excess of emigration over immigration must have amounted to 466,426, or nearly half a million. The population of Ireland at the recent Census but slightly exceeded a half of that enumerated at the Census in 1841, and for the first time fell below the population of Scotland, which exceeded that of Ireland by 15,411.

### Square, Surface, or Land Measure.

The square foot contains 144 square inches
Yard = 9 feet = 1,296 inches.
Rod, pole, or perch = 30¼ yards = 272¼ feet.
Chain = 16 rods = 484 yards = 4,356 feet.
Rood = 40 yards = 1,210 yards = 10,890 feet.

An acre *roughly* stated has four equal sides of 69½ yards; *accurate* measurement gives each side 208.71 feet.

The sides of a square half-acre would be 147.581 feet, and of a square quarter-acre 104,355 feet.

### Measures of Time.

| | |
|---|---|
| 60 seconds = 1 minute. | 28, 29, 30, or 31 days = 1 calendar month. |
| 60 minutes = 1 hour. | 12 calendar months = 1 year. |

| 7 days = 1 week. | 365*d.* 5*h.* 48*m.* 46*s.* = 1 tropical year. |
| 28 days = 1 lunar month. | |

The astronomical day commences at noon, and is computed from 1 to 24 hours.

In 400 years 97 are leap years and 303 common, leap year being omitted every 100 year, but *not* omitted every 400th. (1900 was not a leap year.)

| 60 seconds″ = 1 minute. | 90 degrees° = 1 quadrant. |
| 60 minutes′ = 1 degree. | 4 quadrants, or 360° = 1 circumference or circle. |
| 30 degrees° = 1 sign. | |

The earth rotates at a velocity of 15 degrees an hour (about 17.366 miles a minute at the equator); 1° is therefore equal to 4 minutes.

### Circular Measure.

Diameter of a circle × 3.1416 gives circumference.
Diameter squared × .7854 gives area of circle.
Diameter squared × 3.1416 gives surface of sphere.
Diameter cubed × .5236 gives solidity of sphere.
One degree of circumference × 57.3 gives radius.
Diameter of cylinder × 3.1416, and product by its length, gives the surface.
Diameter squared × .7854, and product by the length, gives solid contents.

A circular acre is 235.504 feet, a circular rood 117.752 feet in diameter. The circumference of the globe is about 24,855 miles, and the diameter about 7,900 miles.

# METRICAL WEIGHTS AND MEASURES.

The French metrical system is based upon the (assumed) length of the fourth part of a terrestrial meridian. The ten-millionth part of this arc was chosen as the unit of measures of length, and called a *Metre*. The cube of the tenth part of the metre was adopted as the unit of capacity, and denominated a *Litre*. The weight of a litre of distilled water at its greatest density was called a *Kilogramme*, of which the thousandth part, or *Gramme*, was adopted as the unit of weight. The multiples of these, proceeding in decimal progression, are distinguished by the employment of the prefixes *deca*, *hecto*, *kilo* and *myria*, from the Greek, and the subdivisions by *deci*, *centi* and *milli*, from the Latin :—

## PRINCIPAL PHYSICAL FEATURES OF CANADA.

The principal physical features of Canada are the Rocky Mountains and the Laurentian range, the plains of the North-West Territories, the great lakes and Hudson Bay and the Bay of Fundy, and the Mackenzie River and St. Lawrence River basins.

The great inland lakes, five in number, form, with their connecting rivers, a complete system of navigation from the head of Lake Superior to the Atlantic Ocean, a distance of 2,381 miles. They cover an area of about 100,000 square miles.

Other lakes of large size are Great Bear, 11,200 square miles; Great Slave, 10,100 square miles; Winnipeg, 9,400 square miles, and Athabaska, 4,400 square miles.

The principal mountains are the Rocky Mountains in the west, extending from the Arctic Ocean to the United States; they contain the highest points in the Dominion, among the chief being Mount Hooker, 16,760 feet; Mount Brown, 16,000 feet, and Mount Murchison, 15,700 feet.

The principal rivers are the St. Lawrence (with its tributaries, the Ottawa, the St. Maurice, the Richelieu and the Saguenay), the St. John, the Restigouche and the Miramichi rivers, flowing into the Atlantic Ocean; the Mackenzie, Coppermine and Great Fish rivers emptying into the Aretic Ocean; the Saskatchewan and Red, the Nelson, Churchill and Albany rivers flowing into the Hudson's Bay; the Fraser and Columbia emptying into the Pacific Ocean.

Hudson Bay is a large inland sea, having an area of 350,000 square miles. Including its two arms it has an extreme length north and south of 1,300 miles and a width across the bay proper of about 600 miles.

The Bay of Fundy, 170 miles long, and from 30 to 50 miles wide, nearly separates Nova Seotia from New Brunswick, the connecting Isthmus of Chignecto being about 15 miles wide.

The principal islands in Canada are Baffin Land, Prince Albert Land (which are the principal islands in the new district of Franklin), Vancouver and Queen Charlotte Islands in British Columbia; Prince Edward Island, Cape Breton Island and Anticosti in the Gulf of St. Lawrence.

The climate varies greatly. The average mean temperature is—in Prince Edward Island, summer, 61·9 degrees F., and 19·5 in winter; New Brunswick, summer 60 degrees and winter 19·0; Nova Scotia, summer 65·2 and winter 25·0; Quebec, 58·3 summer and 15· winter; Ontario, 63·0 summer and 19·8 winter; Manitoba, 60·1 summer and 0·8 winter; British Columbia, summer 61· and winter 32·4.

REIGNING KING AND EMPEROR OF INDIA.—Edward VII.

### EXECUTIVE POWER.

A sovereign, exercising all powers of executive government through a cabinet composed of certain sworn privy councillors, who act as advisers of the crown, and conduct the public administration in accordance with law and constitutional usage. The crown is hereditary, but subject to such limitations as may be imposed by parliament—*i.e.*, by the crown, lords and commons. The head of the administration is the premier, or first minister, who is the choice of the crown; he selects the members of the cabinet and ministry, with the approval of the sovereign. The cabinet consists, at present, of eighteen ministers; the first lord of the treasury is generally premier. In addition to the inner or advisory council, called the cabinet, there are other ministers holding subordinate positions in the government, but who also retire with the cabinet in case of resignation or defeat. The whole number of persons comprising the government of Great Britain, including the chief officials for Scotland and Ireland, is forty-eight. The government hold office as long as they retain the confidence of the house of commons. The common law is the basis of justice in Great Britain and Ireland, and in all colonies and dependencies of the crown. Wherever, in the latter, the civil or other law is in force, it will be stated below in the case of the particular colony.

### LEGISLATIVE POWER AND LOCAL GOVERNMENT.

The parliament of Great Britain is composed of the crown, lords, and commons. The lords consists at present of 592—archbishops (2), bishops (24) and peers, the latter divided into 22 dukes, 22 marquesses, 142 earls, 34 viscounts, and 341 barons. Six princes of the royal blood have also seats in the house. Scotland is represented by 16 peers, elected for each parliament, and Ireland by 28 representative peers elected for life. The speaker is the lord high chancellor of Great Britain, who is a member of the cabinet, and retires with a change of government. The house of lords has co-ordinate powers of legislation with the house of commons, except as respects taxation or money bills. It cannot initiate or amend such bills, but it may under exceptional conditions reject them as a whole. The house of commons is the body where the chief political power rests. It consists of 670 members, elected by the legal electors of Great Britain and Ireland, as follows: England 465, Wales 30, Scotland 72, Ireland 103. All elections are now by ballot. Since the reform bill of 1832 the franchise has been widely extended to all classes who have a stake in the country. The suffrage is now divided among freeholders, copyholders, leaseholders, occupants of lands and tenements, and lodgers of a specified value. The house of commons lasts for seven years, unless sooner dissolved by the crown with the advice of the cabinet. Parliament is summoned, prorogued and dissolved by the sovereign. The speaker and deputy speaker of the commons are elected by the house for the duration of the parliament. Members do not require a property qualification, but they must be British citizens of the age of 21 years, not bankrupts, or idiots or criminals. Members are not paid. The system of local government has been much simplified quite recently. England and Wales are now divided into 62 administrative counties, including the city of London In every county there is a council composed of aldermen and councillors. Aldermen are elected for six years, half of them retiring every third year. A councillor is elected for three years. The counties are again divided into "urban districts" and "rural districts," in which councils are elected. The parish continues to be a unit of local goverment, and the duties formerly performed by "vestries" are now discharged by "parish meetings" and "parish councils." In cities and towns the affairs are administered by municipal corporations, consisting of mayor, aldermen and burgesses; the mayor and aldermen are elected by the council, and the burgesses by ratepayers. Women can be elected only to district councils and parish councils, including the London vestries. Married as well as single women can vote at parochial elections. In Scotland there are parish councils, and municipal bodies in towns and cities. The councils of the latter consist of a provost and bailies. In Ireland in some towns and boroughs there are corporations consisting of mayor, aldermen and councillors. In the majority of towns local government is entrusted to commissioners, appointed by the Irish government.

EXECUTIVE POWER.—The king represented by a governor-general, appointed by the crown, and advised by an executive council, consisting at first of seven members. The government holds office as long as it has the confidence of the people, as expressed by their representatives in parliament. The principles of English parliamentary government prevail in the commonwealth and states of the federation. The common and criminal law of England obtains in all the states. The judicature consists of a federal high court, and such other federal courts as the parliament of the commonwealth may establish. The justices of these courts are appointed by the governor-general-in-council, and hold office during good behaviour. The high court is a court of appeal from the courts of the states. Appeals may be made from

its decisions to the Privy Council of Great Britain under limitations. The state courts remain under the sole jurisdiction of the state governments, and appeal can be made direct to the king-in-council, as heretofore, under certain restrictions.

LEGISLATIVE POWER.—The king, senate and house of representatives. The senators are elected by the people of the states for six years. Each state has an equal representation of six members, and half the number of senators shall retire every three years, but are re-eligible for re-election. The franchise for the election of a senator is the same as that for the popular body at the time of the union. The president is elected by the senate. The place of a senator becomes vacant if he is absent for two consecutive months of a session. The house of representatives consists, as near as possible, of twice the number of senators, but no state shall have a smaller representation than five members. Members are elected for three years. The speaker is elected by the house. Members of each house receive £400 each as a sessional indemnity. Bills appropriating revenue or moneys, or imposing taxation shall only originate in the house of representatives. As in Canada and England by practice, the senate may not amend bills imposing taxation or appropriating revenue or moneys for ordinary annual services of the government. But the senate may at any stage return to the lower house a bill requesting the amendment of any items or provisions therein, and the house may accept or reject such proposals. In case of a deadlock a dissolution takes place, and afterwards a joint sitting at which a majority of votes decide the fate of the disputed measure. The federal parliament has power to alter the franchise on which its members are elected, but it cannot diminish the voting powers of the people, or withdraw the right of women to vote as long as adult suffrage obtains in any states. The legislative powers of the federal parliament are alone enumerated, and all other powers rest with the state parliaments. In the event of a federal law conflicting with an existing state law, the federal law shall prevail. The federal government has the administration of the departments of customs and excise, which form the chief sources of federal revenue, but of the net revenue from such duties not more than one-fourth shall be applied annually by the commonwealth towards its expenditure, and the balance shall be paid to the several states or applied towards the payment of interest on debts of the several states taken over by the federal government. Uniform duties of customs must be imposed within two years after the establishment of the commonwealth. The king may disallow any federal law within one year from the governor-general's assent. The capital of the commonwealth will be within New South Wales, but at least 100 miles from Sydney, and must be in federal territory.

The common and criminal law of England prevails in all the provinces except Quebec, where the old French civil code and English criminal law are in force.

LEGISLATIVE POWER AND LOCAL GOVERNMENT.—The king, senate, and house of commons. The senate is composed of 81 members, when full, appointed by the crown, possessed of property qualification and of the age of 30 years. The speaker is chosen by the crown. It has co-ordinate powers of legislation with the house of commons, except in the case of revenue, taxation, or money bills. Though it cannot initiate or amend such bills, it may reject them under extraordinary circumstances. Members are paid $1,500 for a session of over 30 days, and a sum for travelling expenses at the rate of 10 cents a mile going and returning. The house of commons consists of 213 members, elected from 1885 until 1898 on a dominion franchise, which was, in the latter year, repealed. Dominion elections are run on the provincial systems, with some unimportant limitations. Members require no property qualification, but they must be of the age of 21, and British subjects, not disqualified by law. The speaker is chosen by the commons. Parliament has a legal existence of five years unless sooner dissolved by the governor-general, and meets once every year. Members are paid the same as senators. As Canada possesses a system of federal government, her legislative powers are limited to certain subjects of dominion or national import, set forth in the written constitution, or British North America Act, of 1867, with the residue of power not expressly given to the provinces in the federal government. All the provinces of Canada, except Prince Edward Island, possess a very complete system of municipal government, which entrusts certain *quasi* legislative powers to councils in municipal divisions known as cities, counties, townships, towns, villages and parishes, and elected by ratepayers. The rules and usages of procedure of the Canadian parliament and of the legislatures are based on those of the imperial parliament. The closure does not exist in Canada.

Island 15 are elected on a special real estate qualification.* In all of these provinces, except Nova Scotia, New Brunswick and Quebec in which it is five years, the duration of the assembly is four years, unless sooner dissolved. Sessions are annual. In all of the provinces the speakers of the assemblies are elected by the members. In both houses members are paid. Members require no property qualification. The legislative powers of the legislatures are defined by the British North America Act of 1867. The legislative powers are defined by a dominion act, and are, as nearly as practicable, those of provincial assemblies. Municipal institutions have been established in towns and rural districts, in imitation of the Ontario system.

The gold discoveries in the Yukon have rendered it necessary to provide a simple system of government for that region. **Sweden and Norway**; federal or constitutional monarchical government. Sweden; population, 5,136,441; area, 172,876 square miles. Norway; population, 2,239,880; area, 124,445 square miles.

EXECUTIVE POWER.—The united kingdoms are under the king of Sweden (Oscar II), now a hereditary sovereign, though each kingdom maintains its separate government and laws. The diets of the two countries are to choose a successor to the throne in case of a failure of regular succession; and should they not agree on a suitable person, the choice is made by Swedish and Norwegian deputies. The common affairs of the united kingdoms are considered by the king, with the assistance of a council of state, composed of Swedish and Norwegian ministers.

LEGISLATIVE POWER AND LOCAL GOVERNMENT.—1. In Sweden there is a council of state of 11 members; a diet or parliament of two houses; an upper or first house of 150 members elected by provinces and town corporations for nine years; a lower or second chamber of 230 members, elected by residents of rural districts and towns for three years on a franchise based on property and income. Members of the second chamber are alone paid. The ballot is in use.

2. In Norway there is a council of state to advise the king, and a storthing, or great court, of 114 members elected for three years on a franchise based on property and income, or public service. The system of election is indirect. The people elect certain deputies every three years, these latter assemble and choose the representatives to the storthing. The storthing, when elected and assembled for business, is divided into two houses, the "lagthing," or one-fourth of the storthing, and the "odelsthing" or remaining three-fourths of the storthing. The odelsthing has the whole right to inspect and consider public accounts. All new laws are initiated in the lower house, and are accepted or rejected by the lagthing. If the two houses do not agree, they assemble in joint session, and a majority of two-thirds decide. Members are paid.

3. A system of local government exists in both Norway and Sweden, and the representative principle prevails to a modified extent.

**Switzerland**, federal republic; population, 3,312,551; area, 15,976 square miles.

EXECUTIVE POWER.—The supreme executive and legislative power is in a parliament called, when united in joint session, the bundes-versammlung or federal assembly, composed of two houses, a ständerath or state council of 44 members, or two chosen and paid by each canton; a nationalräth or national council of 147 representatives elected by direct vote every three years and paid out of the federal funds. The federal assembly elects president and vice-president one year and a bundesrath or federal council for three years. Members of the council can sit and debate but not vote in the two chambers. President, 1902, Joseph Zemp.

LEGISLATIVE POWER AND LOCAL GOVERNMENT.—The principles of initiating measures by popular vote (the initiative), and of submitting acts to direct vote (the "referendum") are in force in this republic. The legislative powers of the nation are set forth in the constitution. Each of the cantons has a system of local government based on the fullest possible expression of the popular will. Legislative assemblies and executive councils exist, and in a few cantons there are landsgemeinden or assemblies of the male citizens for the purpose of making laws and appointing their administrators. The "initiative" and "referendum" also exist to a considerable extent. The cantons or states are sovereign and only limited by the constitution.

**Turkey**, absolute monarchy; population, about 40,000,000; area, 1,580,677 square miles (including Samos, Egypt and other dependencies). Turkey in Europe has a population of 6,000,000, and an area of 62,752 square miles.

EXECUTIVE POWER.—Hereditary sultan (Abdul Hamed II), whose executive and legislative authority is only limited by the precepts of Mahomet. The sultan is aided by a sadrazam (grand-vizier), and a sheik-ul-islam, who are respectively at the head of temporal and spiritual affairs under the direction of the sultan.

LEGISLATIVE POWER AND LOCAL GOVERNMENT.—The people have no legislative or popular assemblies or councils. The whole country is divided into governments, appointed by and subject to the decrees of the sultan.

He has also the benefit of the advice of an English financial adviser appointed by himself, and whose consent is necessary to every decision on financial matters. He can sit on the council though not a member of the executive. British influence prevails in administration.

*Legislative Power and Local Government.*—The khedive has promulgated a constitution intended to give the people a share in legislation, but so far it is practically nugatory. Egypt is divided into governorships of towns and provinces with extensive powers, but all under the control of the khedive and executive.

EXECUTIVE POWER.—President, elected for four years under the constitution by electoral colleges in each state equal to the whole number of its senators and representatives in congress; but practically the election is by the direct vote of the people. Each political party nominates a set of electors on a presidential ticket and the people vote directly for them. Under the constitution the electors meet in each state on a particular day and invariably cast their votes in accordance with the result of the election. There is also a vice-president elected by the same political method. The president is head of the executive, and has a veto over the legislation of congress, but it can be over-ridden by a two-thirds majority in each house. He is aided by a cabinet of eight secretaries of state and heads of departments, appointed by himself with the approval of the senate, but having no seats in or responsibility to congress. In case of death, resignation or disability of the president, the vice-president succeeds. [On the assassination of President McKinley, Vice-President Roosevelt succeeded on 14th September, 1901, and holds office until March 4, 1905.] If there is no vice-president the secretary of state or other members of cabinet succeed in order of seniority until a new president is appointed or the disability is removed. Elections for president and vice-president take place on the Tuesday following the first Monday in November every fourth (leap) year, and they take office on the 4th March following.

LEGISLATIVE POWER AND LOCAL GOVERNMENT.—Congress of two houses; a senate of 90 members, or two from each state, chosen by the legislatures for six years; a house of 357 representatives elected every second year by the electors of the states in accordance with their respective election laws; universal suffrage limited in a few cases by residence, educational tests, registration and payment of taxes. Senators must be 30 years of age, citizens for nine years, and residents of the states which elect them. Representatives must be about 25 years of age, citizens for seven years, and residents of the states in which they are elected. The senate has the power of approving or rejecting the higher appointments and treaties made by the president, and of acting as a court of impeachment for the president, judges of the supreme court, and other high functionaries. It can also amend bills for raising revenue, which alone can originate in the house of representatives. The vice-president is *ex-officio* president of the senate, which may also appoint a temporary president. The speaker of the house is elected by its members. Members of both houses receive $5,000 and travelling expenses every year. The territories are represented by one elected delegate in each case, who cannot vote in the house. The legislative powers of the congress are enumerated in the constitution. The supreme court of the United States can hear and determine issues of laws as to the interpretation of the constitution and may declare the acts of congress

unconstitutional or *intra vires*, as the case may be. The federal judges are appointed by the president with the approval of the senate. A permanent civil service is being gradually built up, and removals from office in the case of officials, not political in their nature, are very much less frequent of late years with the extension of civil service rules to all departments.

*Executive Power.*—In each state there is a governor and a lieutenant-governor and officers to administer the government. The governor and lieutenant-governor are elected by the people for four years in following states: California, Delaware, Florida, Georgia, Illinois, Indiana, Kentucky, Louisiana, Maryland, Mississippi, Missouri, Montana, Nevada, North Carolina, Oregon, Pennsylvania, Virginia, Washington, West Virginia, and Wyoming. In the following states the term is three years: New Jersey and New York. In the following, two years: Alabama, Arkansas, Colorado, Idaho, Iowa, Kansas, Michigan, Minnesota, Nebraska, New Hampshire, North Dakota, Ohio, South Carolina, South Dakota, Tennessee, Texas, Vermont, Wisconsin. In the following, the term is one year: Connecticut, Maine, Massachusetts and Rhode Island. All the governors have the power of veto over legislation except in Delaware, North Carolina, Ohio, Rhode Island. It requires a majority or two-thirds vote to over-ride the veto. The governor is the head of the executive and has no responsible ministers in the English or Canadian sense, but the executive or administrative officers are generally elected.

*Legislative Power and Local Government.*—In all the forty-nine states there is a legislature of two houses; an upper house, generally called senate, and a house of representatives, both elected by the people of the state. In the following states the senate is elected for four years, the house of representatives for two years, and sessions are biennial, with the exception of the states mentioned: Alabama, Arkansas, California, Colorado, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Mississippi (annual), Missouri, Montana, Nevada, North Dakota, Oregon, Pennsylvania, South Carolina (annual), Texas, Utah, Virginia, Washington, West Virginia and Wyoming. In the following states the term is for the senate two, for the house, two, and sessions biennial: Idaho, Michigan, Nebraska, New Hampshire, North Carolina, Ohio, South Dakota, Tennessee, Vermont. In the following states the term is one for both senate and house, and sessions annual: Connecticut, Maine, Massachusetts, Rhode Island. In Minnesota the term of the senate is two years, of the house one, and sessions annual. In New York the senate two, the house one, and the sessions annual. In New Jersey the senate three, the house one, and the sessions annual. Universal suffrage is the rule, though Delaware has a tax qualification in state senate elections. In some states the payment of a poll tax, illiteracy and residence enter into qualifications. In Colorado, Idaho, Utah and Wyoming women can vote. Members of the legislature are paid. All public officials, state and municipal, are elected as a rule, but the tendency in the older states is to have a permanent public service apart from political heads. In 31 states the judges are elected by the people; in five, by the legislature; in eight, appointed by the governor, subject to confirmation by the legislature or council. The Australian or Canadian ballot is now in force in 40 states; nine have passed stringent laws against corrupt practices at elections, but they are practically effective in only two or three states.

Throughout the union there is a very complete system of township, county, and city government. Township local government prevails in the New England states, the county is generally the unit in the south; in the middle and north-western states there is a mixed system. In several of the western states women can vote and be elected for municipal and school bodies. In all cases councils are elective. In the large cities there have been cases of gross corruption and mismanagement, and the best methods of improving municipal government are now attracting much serious attention.

*Executive Power.*—In the territories the governors and other officials, including judges, are appointed for four years by the president of the United States. The legislature (council and house of representatives) of the organized territory of Hawaii is elected for two years, but its powers of legislation are large, though subject to federal restrictions. In the other territories there are only governors and officials appointed by the president.

## THE LAKE ST. JOHN TERRITORY.

The territory in question extends from the head of navigation of the River Saguenay, at Chicoutimi, to the northern boundary of the Province of Quebec, a distance of 220 miles, and from the sources of the waters flowing into Lake St. John, from the East, to the River St. Maurice, and embracing the valley of the River Batiscan, a distance of 200 miles, the whole forming an area of 44,000 square miles or about 28,000,000 acres. Comparatively little is known of this great country, with the exception of the valley of Lake St. John, which, within the last few years, has been colonized with great rapidity, and now contains a population of some 49,765.

The Saguenay and St. Maurice regions are the field of large lumbering operations, estimated at 60,000,000 feet, B.M., per annum, or equivalent to nearly one-fourth of the whole export of sawn lumber from the port of Quebec. The country is thus described by a gentleman who visited it:

**The Soil** "Is almost universally composed of a rich grey clay, the land seems to be inexhaustible. At Pointe-aux-Trembles I was shown a field of wheat, which had been producing that grain for the last fifteen years, without the application of any manure; and the grain I saw was as fine as any to be found in this district. Truly, one is struck with wonder at the richness of the soil, for I believe there is none richer in Canada.

**"The climate of the Lake St. John region** is said to be that of Montreal; there is no doubt of its being superior to that of Quebec. The snowfall is certainly less. In fact, farmers complain that they do not get good sleigh roads till late in the winter. On the 25th September the leaves of the trees were very little tinted, and potato stems were still green." Wheat and all grains ripen and produce abundantly, as may be seen from the following extracts taken from the census returns:

| | 1861. | 1871. | 1881. | 1891. |

Potatoes, carrots and other vegetables yield abundantly and are of immense size. Wheat is of course the great test of the soil and climate of any agricultural country. Let us then compare its production at Lake St. John with the best districts of the Province, viz: The Eastern Townships, and we find that the census returns show in 1881:—

| | Population. | Bush. Wheat. | Bush. per 1000 of pop. |

# THE KING'S CIVIL LIST.

Consequent upon the death of Her Majesty Queen Victoria, and the accession of His Majesty Edward VII., there was passed in the Parliamentary session of 1901 what is known as the Civil List Act, the Act by which is determined what charges shall be made on the consolidated fund for the maintenance of the King and his family.

Until George III. came to the throne in 1760, the income of the sovereign was derived chiefly from Crown lands, from a variety of landed property in England and Wales, Scotland and Ireland, in which the sovereign had a life-interest, and from which he received the rents. In the feudal ages these lands constituted a princely patrimony. In later times this Crown property was greatly reduced by lavish grants to royal favorites. At the Restoration the income from Crown lands was ascertained by a committee of the House of Commons to amount to £217,900 a year, in addition to £4,000 from the Forest of Dean. By the time Charles II. had been on the throne three years he had by his lavish bestowal

of the lands on favorites reduced the income to £100,000. William III., by his grants to favorites who had accompanied him from Holland, made further havoc with the Crown domains; so much so that at the accession of Queen Anne Parliament endeavored to save the remnant by an Act (1 Anne, c. 8) which prohibited alienation of Crown lands, and enacted stringent provisions in regard to the length of the term for which they might be leased and the rents reserved.

Queen Anne, George I. and George II. derived the larger part of their income from their life-interest in the Crown property, but when George III. came to the throne he surrendered his life-interest in the Crown lands. It was turned over to the nation in return for a fixed Civil List of £800,000, subsequently increased to £900,000. George IV., William IV. and Queen Victoria, on their accessions, surrendered their life-interest in the Crown lands in return for a Civil List. The same course was taken by Edward VII. when he came to the throne; and soon after Parliament assembled a committee of the House of Commons was appointed to recommend the new Civil List. It reported on the 4th of April, 1901, and its recommendations were embodied in an Act (1 Edward VII., c. 4), which was read a third time in the House of Commons on June 18th. By this Act the King's Civil List was fixed at a yearly sum of £470,000, assigned as follows:

| CLASSES OF EXPENDITURE. | SUM APPROPRIATED. |
|---|---|
| I. Their Majesties' Privy Purse | £110,000 |
| II. Salaries of His Majesty's household and retired allowances | 125,800 |
| III. Expenses of His Majesty's household | 193,000 |
| IV. Works | 20,000 |
| V. Royal bounty, alms and special services | 13,200 |
| VI. Unappropriated | 8,000 |
| Total | £470,000 |

In the event of Her Majesty Queen Alexandra surviving the King it is enacted that there shall be paid to the Queen during her life an annuity of £70,000.

Another clause provides that there shall be paid to the Duke of Cornwall and York "during the joint lives of his present Majesty and of his said Royal Highness, an annuity of £20,000"; that "there shall be paid to the Duchess of Cornwall and York during the continuance of her marriage with the Duke of Cornwall and York, for her sole and separate use, but without any power of anticipation, an annuity of £10,000; and that in the event of the Duchess surviving the Duke there shall be paid to her during her life an annuity of £30,000."

In respect to His Majesty's daughters, Princess Louise (Duchess of Fife), Princess Victoria and Princess Maud (Princess Charles of Denmark), it is enacted that as a provision for them there shall be an annual allowance of £18,000 during their joint lives, "to be reduced at the death of each of the said princesses by £6,000."

The Civil List of Her late Majesty, Queen Victoria, as fixed by the Act of 1837, was £385,000, assigned as follows:

| | |
|---|---|
| Her Majesty's Privy Purse | £ 60,000 |
| Salaries of Household | 131,260 |
| Expenses of Household | 172,500 |
| Royal Bounty, etc. | 13,200 |
| Unappropriated | 8,040 |

At the death of the Queen, the allowances to Her Majesty, to the Prince and the Princess of Wales, and in respect to the Prince of Wales's children, aggregated £471,000, The details of these payments were:

| | |
|---|---|
| Her Majesty's Civil List | £385,000 |
| The Prince of Wales (26 Vict., c. 1) | 40,000 |
| The Princess of Wales (26 Vict., c. 1) | 10,000 |
| Annuity, Prince of Wales's children (52-3 Vict., c. 35) | 36,000 |

Until the death of the Dowager Empress of Germany, on August 5th, 1901, annuities amounting to £72,000 were payable to other members of the Royal Family. These annuities were not affected by the death of the Queen, but with the death of the Dowager Empress an annuity of £8,000 came to an end.

The annuities to the Royal Family after the resettlement at the accession of Edward VII. stand thus:

| | |
|---|---|
| His Majesty (Civil List) | £470,000 |
| Duke of Cornwall and York | 20,000 |
| Duchess of York | 10,000 |
| Princesses Louise, Victoria and Maud | 18,000 |
| Princess Christian of Schleswig-Holstein | 6,000 |
| Princess Louise, Duchess of Argyle | 6,000 |
| Duke of Connaught | 25,000 |
| Princess Beatrice (of Battenburg) | 6,000 |
| Duchess of Mecklinburg-Strelitz | 3,000 |
| Duke of Cambridge | 12,000 |
| Duchess of Albany | 6,000 |
| Total | £582,000 |

The revenues of the Duchies of Cornwall and Lancaster are outside the Civil List arrangement. Those of Cornwall are vested in the eldest son of the reigning sovereign, who becomes by birth the Duke of Cornwall, by virtue of a patent of Edward III. in 1337. The Duchy of Lancaster was the private patrimony of Henry Bolinghroke, son of John of Gaunt. It is separate from the other possessions of the Crown in order and government, but united to it in point of inheritance.

# THE BRITISH ARMY IN 1902-1903.

During the first six months of 1902 the British Army, as in 1900-1, was on a war footing. On the 1st of January there were 237,000 men in South Africa. These troops were made up as follows:—

| | |
|---|---|
| Regulars | 141,000 |
| Colonials | 57,000 |
| Yeomanry | 13,650 |
| Militia | 20,000 |
| Volunteers | 5,400 |

The army estimates were taken on the 4th of March, two months before peace was declared. At that time the House of Commons sanctioned a vote of £69,310,000 for the army and war expenses; and in this vote provided for the pay of 420,000 men in all branches of the service. When this vote was taken Mr. Brodrick, Secretary-for-War, stated that during the years 1901-2, 53,000 men had been sent out as drafts; and that, including drivers and other men attendant on the army, there were then 300,000 men in army service in South Africa. Peace was not then in sight; and by this vote of March 4th provision was made for continuing the war for another eight or nine months. Soon after the conclusion of peace the transport of troops back to Great Britain and the colonies began, and on arrival home the reserves, the militia and the volunteers who had been in South Africa were disbanded; and, except for the fact that a large number of regulars were retained in South Africa, the British army was once more on a peace footing, and during the year the War Office was busy with its new plans for raising the permanent strength of the army to 250,000 men.

There had been no fighting in South Africa of any importance for about two weeks before May 31st, 1902, the date on which the Boers accepted the British terms. Many deaths from disease and wounds were reported subsequent to the submission of the Boers. Excluding these the accompanying table sets out the deaths and casualties during the war—that is from the 11th of October, 1899, when Kruger sent his ultimatum, until the 31st of May, 1902, by which time the war was at an end.

| Casualties. | Officers. | Men. |
|---|---|---|
| Killed in action | 518 | 5,256 |
| Died of wounds | 183 | 1,835 |
| Prisoners who died in captivity | 5 | 97 |
| Died of disease | 339 | 12,911 |
| Accidental deaths | 27 | 771 |
| Total deaths in South Africa | 1,072 | 20,870 |
| Missing | — | 105 |
| Sent home as invalids | 3,116 | 72,134 |
| Total South African Field Force | 4,188 | 93,289 |
| Total of officers and men | 97,477 | |

The table below gives the losses to the British troops in the principal engagements of the war.

The killed include deaths from wounds, but those so included are deducted from the wounded column.

Twice while the war was in progress Parliament sanctioned reforms in army organization and in army conditions. In 1901 it approved the new organization scheme, the main lines of which were given in The Canadian Almanac for 1902. Last year (1902) it sanctioned a reform under which the pay of the rank and file of the army is greatly increased, and by which other changes are made with a view to attracting more recruits. In recent years recruits have varied in number from 27,800 in 1896 to 46,700 in 1900. In 1901 the number was 45,100. If the regular army is to be kept at 250,000, the number now being aimed at, 50,000 recruits a year will be required, and the War Office is hopeful that under the new scheme of pay this number will be forthcoming. In submitting the new scheme to the House of Commons Mr. Brodrick made an interesting statement as to the conditions which in the past have governed army service in Great Britain. "The whole scheme of recruiting, whether for a volunteer or conscript army," he said, "has been a trouble from time immemorial to every monarch and minister. In our own army our difficulties began very early. We have never reached an amount of pay which has been satisfactory to the army, and I am not sure that we have reached an amount of pay satisfactory to the country. From the beginning of last century there has been a steady progress to a better condition of the soldier's service. The share of the soldier in the general progress of civilization has been very significant. Better

education and better conditions of service have done much, but one thing has done more for the army, namely, the shortening of the term of enlistment. We began with perpetual service, then we came down to 21 years, then to seven, more recently we tried the experiment of three years, and I think I may truly say that the more the soldier has been merged into the citizen, and the more exchange there has been between the citizen and the soldier, the better has been discipline, the less has been crime in the army, greater has been recruiting, and more confirmed has become the popularity of military service."

After assuring the House that it was hopeless to expect that the army could be brought to a strength of 250,000 men and kept at that strength under the existing terms and conditions of service Mr. Brodrick described the new scheme. "At present", he said, "when a soldier joins he gets nominally ninepence, or, with stoppages, eightpence a day, and when he reaches the age of nineteen this is raised to a total of tenpence a day. That does not seem to me, considering the rising wages outside, to be a sufficient inducement to the soldier. We propose that a shilling a day shall be given to the whole army on the 1st of April this year. The whole shilling shall be given to every recruit as soon as he has passed his recruit drill and gone into the ranks. Then, as to supplying the drafts, we propose that after two years' service every man shall make his election. He may either go to the reserve as he originally agreed to do after three years, or he may elect to complete eight years with the colours and go to the reserve for four years. If he elects to abide by the original engagement he will remain at his rate of pay of a shilling a day. If he elects to go on for the eight years he will receive an extra sixpence, making in all eighteenpence a day, from the time he completes two years' service. Bad characters and inefficient soldiers will not be allowed to re-engage, and the commanding officer will have power to stop the re-engagement of men who are either saturated with disease or alcohol. We propose, further, to raise the standard of marksmanship, and to have only two classes—the efficient shot and the inefficient shot. Until a man can get into the efficient class he will get fourpence a day instead of sixpence. We intend to abolish the present system of good conduct pay, and to allow the commanding officers, after two years, to give a man a badge without pay." In summarizing the changes Mr. Broderick stated that the net result would be that a man who joins the army at eighteen will when he reaches twenty have ten and sixpence in his pocket at the end of the week to spend. "I believe," he added, "that the number of labourers in that position is not so very large." As to the cost of the improvements in army conditions Mr. Brodrick explained that for Great Britain it would be about £1,048,000 a year. For India, which bears the cost of the troops stationed within her borders, it would be £786,000 a year.

After the re-organization plan of 1901 had been adopted by Parliament there was much scepticism in the newspaper press as to the likelihood that the War Office would be able to carry the scheme to a successful completion. Mr. Brodrick referred to this attitude of the press towards the scheme when he submitted the army estimates to the House of Commons on the 4th of March last. "If we have not got our first army corps at Aldershot," he said, "it is because we have got the equivalent of four to five army corps of regular troops in South Africa. The staff of the first army corps are engaged in training troops which have gone out and are going out constantly to fill up the gaps which occur. The scheme itself continues to hold the field. It holds the field for this reason, that we have been able to establish a standard up to which we are working. The barracks in every district are being built according to the disposition of the army corps, training grounds are being obtained, and steps are being taken which will enable us to begin that system of delegation and decentralization upon which the mind of the War Office is set as much as the mind of that House. The Yeomanry have gone up from about 10,000 to 17,500. Twenty-one new regiments required to be formed; 14 have been completed, and we have proposals for five more, and I have very little doubt we shall ultimately obtain the number we require. Then as to the garrison regiments. We were empowered last year to raise eight garrison regiments out of soldiers who had already served their time in the army. Five regiments have been formed, and we intend shortly to form a sixth."

The British forces now compose what is described as a short service army. This term distinguishes it from the army of a generation ago. In the army, as it existed prior to 1873, men enlisted for 21 years, and at the end of that time were discharged with a pension. In 1873 this long service system came to an end, and in its place there was established what is now known as the short service plan.

About the time the short service system was established, what is known as the territorial system also came into being. Formerly infantry regiments were known by numbers, and generally in addition by titles which belonged characteristically to the regiments, or which commemorated some event or incident of outstanding importance in regimental history. Nowadays and since the early seventies, infantry regiments are known by the names of counties. When the re-arrangement took place regiments were assigned by name to this or that county, and their depots were then established in the neighbourhoods from which the regiments then took their names.

There are now 69 of these depots, and English, Welsh, Scotch and Irish county names are borne by the various regiments. The idea at the bottom of the territorial plan was to give regiments territorial connections, to make them locally popular, and as far as was practicable to mass soldiers hailing from the same part of the country into regiments officially connected with the counties from which the men came. To this end, since the seventies, it has been the practice to recruit regiments from the parts of the country in which their depots are situated. No matter where the main body of the regiment may be stationed, at Aldershot, at the Curragh, in India, or in Malta, its depot remains in the neighbourhood to which the regiment is titularly attached. A staff of commissioned and non-commissioned officers of the regiment is stationed at the depot. There the recruits are received; they are put through a long and hard course of preliminary training, and at the end of this course are drafted from the depot to the colours.

Recruiting officers are permanently stationed in most of the large English towns and cities, and frequently these officers go on special duty into the country villages. London is, however, the great recruiting ground of the army.

A man who offers for the army may enlist for 12 years, the whole of which period is spent with the colours, or he may elect to serve for part of the term with the colours and the remainder of it with the reserve. The 12 year enlistment plan applies to the regiment of household cavalry, to the corps of ordnance artificers, to the band of the Royal Military College, the corps of army schoolmasters, the corps of armourers, bandsmen in the foot guards, royal engineers who enlist for appointment as military machinists, and men enlisted for appointment as sergeant master tailors. Less than 2,000 men on an annual average enlist under this 12 year plan. All boys between 14 and 16, who are accepted to be trained as musicians, trumpeters, drummers, buglers, or tailors, must join for 12 years. The shorter service system, on the other hand, applies to cavalry of the line, royal artillery, infantry of the line, ordnance store corps, the army service corps, the foot guards and the medical staff corps, royal engineers, and the post office corps and royal engineers of the telegraph and railway reserve.

The age and physical conditions governing acceptance for the various services in the army in time of peace are as follows:—

CHEST MEASUREMENT AND WEIGHT.

The minimum chest measurement is fixed at 33 in., and the minimum weight at 115 lbs.; but the chest measurement and the weight of each recruit depend upon his height and the arm of the service he wishes to join, and are left to the discretion of the approving medical officers.

It is still possible under the short service plan for soldiers to re-enlist and to serve for 21 years. After this length of service has been put in, soldiers become entitled to pensions. For privates and gunners, the pension is from 8d to 1s 6d per day; for non-commissioned officers, 1s 3d to 3s 6d per day; for warrant officers, 2s to 5s per day. Soldiers discharged on account of wounds or injuries received in action, or for sickness incurred in the performance of their military duty, are entitled to a pension varying with the extent of the disability and with the length of service.

The increase in the rate of soldiers pay bringing it up to one shilling a day clear of all deductions dates from April 1st 1902. The other part of the new scheme of 1902 does not come into operation until the 1st of April 1904, and is governed by a Royal Warrant issued on March 27th 1902 which sets out that—

On and after 1st April, 1904, the following further daily increases of pay shall be granted to all warrant and non-commissioned officers (including paid lance ranks); and to efficient soldiers, who have enlisted for more than three years with the colours, or have been permitted to extend their service, excluding Maltese or non-European soldiers, but including the royal garrison regiments:

| SERVICE PAY. | d. |
|---|---|
| Efficient soldiers, Class I. | 6 |
| Ditto, after 5 years' total service | 7* |
| Efficient soldiers, Class II | 4 |
| Ditto, after 5 years' total service | 5* |

* Increase of 1d. for good conduct.

Class I shall consist of all warrant and non-commissioned officers (including paid lance ranks); and of men who have completed 2 years' colour service, and who have, in the opinion of the officer commanding their unit, attained all necessary proficiency in the duties of their arm, including, in the case of infantry, such a standard in musketry as may be prescribed by regulation.

Class II shall consist of other soldiers who are allowed to extend their colour service, or who, having been enlisted for more than three years, are not placed in Class I; provided in either case that they have completed two years' colour service. Soldiers enlisted for three years with the colours, and, who have not extended their service, shall, if retained with the colours on account of war, be granted service pay during such retention.

The daily rates of pay of the several ranks of the different arms of the service now in force are as follows:

A soldier who has been in the army for not more than three months may claim his discharge on payment of £10. After three months the sum is £18, and in this case the permission of the commanding officer is necessary. Discharges by purchase, however, are allowed to the fullest extent consistent with the requirements of the service, and at ordinary times a soldier finds no difficulty in purchasing his discharge.

Until 1871, commissions in the army were bought and sold. Commissioned officers nowadays are drawn from the military academies at Woolwich and Sandhurst; and admission to these schools is obtained only after stiff examinations have been passed. In the army, promotion is by seniority. The pay of a lieutenant is 5s 4d a day; of a captain, 11s 7d a day; of a major, 16s a day; and of a lieutenant-colonel, 21s a day. There are some other allowances; but the pay and allowances of officers are not sufficient to maintain them in the style which, according to the social traditions of most regiments, officers are expected to keep up. Comparatively few of them are dependent entirely on their army pay.

What are described in England as the auxiliary forces comprise the militia, the volunteers, and the yeomanry cavalry. The militia is the oldest of these services. It is older than the standing army, and until the second or third decade of the nineteenth century all men not suffering from bodily infirmities due to age or other causes, and not specially exempted, were liable to be drawn by ballot for the militia. They could serve either personally or by substitute. Ballots were taken in counties until 1830 to make up the quota of militia each county was compelled by the law of 1760 to equip and maintain.

The militia is a local force, each regiment being raised in the division of the county in which the regiment has its head-quarters. It is called out each year for a period of training which cannot exceed 56 days. The men enlist for six years, and when under training their pay, their discipline, and the general conditions of their services are very similar to the conditions in the regular army. Until as late as 1871 the militia regiments in each county were nominally under the command of the lord lieutenant of the county; and nowadays, although there are examinations for officers' commissions in the militia, in issuing these commissions the War Department gives preference to local landed gentlemen who are recommended or nominated by the lords lieutenants, the King's representatives in the counties. In connection with the militia there is a reserve, consisting of men who have accepted extra bounties to hold themselves in readiness to serve abroad if need be in the regular army.

The yeomanry cavalry, which in 1900 was given the name of the Imperial Yeomanry, in its old form was a volunteer force, dating back to the Napoleonic wars. It was composed chiefly of tenant farmers. Many of the great landlords made it a condition in their farm leases that their tenantry should be of the yeomanry. For a long time the yeomanry was but lightly regarded as an auxiliary force. New life, however, was infused into it

during the war. Its numbers were greatly increased; and under a royal warrant of the 17th April, 1901, the force was reorganized. It then became permanently the Imperial Yeomanry. The old brigade organization was abolished, and the force is now organized in regiments of four sections, with a regimental staff and a machine gun section. The regiments are under training in camp for sixteen days each year.

Members of volunteer corps are enrolled for three years, and are compelled to put in sufficient time at the drill hall, on the parade ground, and at the rifle ranges, to make themselves efficient, and to pass the annual inspection before an officer from the War Department. Non-efficient volunteers can be sued in the courts for any loss falling upon their regiment in consequence of their failure to earn the Government grant. The officers are drawn from the ranks of the professional and commercial classes. There is no pay to the holder of a volunteer officer's commission. On the contrary, he incurs considerable expense in connection with his office, a fact which accounts for vacancies in many of the volunteer corps.

# THE BRITISH NAVY IN 1902-1903.

The navy estimates were submitted to the House of Commons on the 15th of February, and again as in 1901 there were large additions to the votes. In 1901-2, the expenditure was £30,875,500, plus a supplementary vote for £191,000, due to the extraordinary progress which was made during the year with new construction work. During the year 1902-3 the expenditure will be £31,255,000; and in 1902 a ship-building programme which calls for the expenditure of £9,058,000 was sanctioned by Parliament. The programme entered upon in 1901 call for an expenditure of £9.003,000. . What these figures for 1901-2 and 1902-3 mean in the way of increases becomes clear when it is stated that between 1889 and 1901 the average expenditure on ship-building was £5,619,676. The vote of 1901-2—£9,003,000—was up to that time the largest vote ever asked from parliament for additions to the fleet. It is exceeded in the vote of 1902-3 by £55,000.

Last year (1901-2) the number of men allowed for in the navy estimates was 118,625, an increase of 3,745 over the number for 1899-1900. For 1902-3 the estimates cover the pay of 122,500 men; and there will be 7,100 men available for the Fleet Reserve. "This," said Mr. Arnold Forster, Secretary to the Admiralty, in proposing the estimates to the House of Commons, "is a satisfactory and steadily growing addition to the fleet." "I think every naval member will agree with me," he continued, in alluding to the sources in Great Britain from which additions to the reserve of seamen are being drawn, "that we can hardly draw from a better source for the reinforcement of the navy in time of war. But there are other sources to which we must look to fill up the complements of our ships in time of war. The last year has been marked by the readiness of our great colonies to assist us in military operations. A great sea empire must always desire that this co-operation should also extend to the navy, and the year has also shown that we may happily look forward to such assistance. We have had entries from Newfoundland, but there have been difficulties in the fact that it was discovered that the enrolment of these volunteers was not within the four corners of the law, and a Bill will be presented to the House without delay to completely legalize this experiment, not only in Newfoundland, but also in all other colonies and dependencies of the Empire. There is one other source of supply for the *personnel* of the navy to which I must refer. It has been the tradition of the navy in time of war to rely upon volunteers. It may be anomalous to refer in this connection to the press gang, but the same element which used to be touched by the press gang we now hope to introduce into the navy by volunteering, and so in time of war to transfer from the civilian maritime population men who with proper training will be of immense value to the navy. A committee has been appointed under the presidency of my right hon. friend the member for Berwick (Sir E. Grey) to examine into the question of a reserve volunteer force, which I hope will end in enabling us to take some steps in reviving a volunteer force for the navy."

Turning next to the additions to the navy—to the ships completed during the year, to those in progress, and to the new programme of 1902-3—Mr. Forster congratulated the House on the unparalleled progress which had been made with new ships during the year 1901-2. "Last year," he said, "I ventured to give a pledge to the House that the very large sum then voted for ship construction would be spent. It is a singular circumstance, but a fact, that in the memory of the oldest inhabitant of the Admiralty there has been no instance during the period of iron ship-building where the whole sum during the year for which it was voted has been spent in construction. The whole of the amount voted by the House for the purposes of construction has not only been expended, but we are compelled to ask for an additional sum of £191,000 by way of supplementary estimate, in order to pay for the work during the year. I can assure the House that the progress made in construction has been almost unparalleled. The long period of arrears and delays has come to an end. On two of our most powerful armour cruisers we have spent, in excess of the year's cost, no less than £70,000 on each ship. We have a great ship now lying at Portsmouth—the *Good Hope*—which has been delivered two months before the contracted date. The difficulty with regard to armour has now been got over, owing to the patriotic exertions of the great armour makers. I think I can say that the relations between the Admiralty and the great contractors are of a harmonious description." Dealing with the additions to the fleet Mr. Forster said: "I defy any hon. member to contend that this programme is not a large and worthy programme even for a country that depends so entirely upon its fleet. We have no right to complain that this country is not entering upon adequate construction."

The forty-nine additions to the fleet during 1901-2 were:

Battle-ships.—Formidable, Implacable, Irresistible, Bulwark, Vengeance.

Armoured cruisers.—Aboukir, Cressy, Hogue, Sutlej.

First-class cruiser (protected).—Spartiate.

Third-class cruiser (protected),—Pandora.

Sloops.—Mutine, Rinaldo, Espiègle, Fantome.
River steamers.—Teal and Moorhen.
22 destroyers, 4 torpedo-boats, 5 submarines.

These vessels all passed into service during the year. How the navy has been strengthened during the last eight years is shown by some official figures published in May last by the committee which was appointed in January, 1901, to enquire into the arrears then existing n ship-building. At the time the committee reported these arrears had been overtaken. The enquiry extended back to April 1st, 1896. There were then in building in government and private yards forty-nine ships for the Royal Navy. Between that date and the end of the enquiry one hundred and forty-three more ships had been begun; and of the total of 192 ships 160 had been completed by the time the committee made its report.

Last year (1902) a committee was appointed to inquire:—"How far are the present systems in force for the provision of reserves satisfactory or capable of extension, as to officers of all branches, seamen, stokers, marines, sick berth staff, and other ratings? How far can a naval volunteer movement be utilized to contribute towards the manning requirements of the war fleet? Is it feasible to form some auxiliary branch of the Royal Marines which could be made available for service on shore or afloat in time of war? To what extent and in what manner can colonial naval reserves be utilized to contribute towards the manning requirements of the war fleet, bearing in mind that on the outbreak of war the men in reserve would be in the colonies, and that, as at present arranged, the ships in reserve that they could help to man would, with some few exceptions, all be in home ports? Generally, whether and how, consistent with efficiency, naval reserves can be more fully utilized to supplement the active service ratings in peace or in war?" This committee which is of especial importance to Canada and the other colonies, had not reported at the time these pages of THE ALMANAC went to press.

The accompanying figures, covering battleships and all descriptions of cruisers (armoured, protected and unprotected) built or in building, show the comparative naval strength of Great Britain and six other powers on the 15th of January, 1901:

*Armoured cruisers – built, 9; in building, 20; protected cruisers—built, 103; in building, 4; unprotected cruisers, 11; total, 147.

It has long been the policy of the British Admiralty to build part of the new tonnage in the Government dockyards, and part in private yards. Of the twenty-eight new vessels (not counting submarine boats) sanctioned by Parliament in 1901 two battleships, one armoured cruiser and two sloops are now in building in royal dockyards, in which there are about 32,000 men at work.

New arrangements were come to in 1901 between the Admiralty and nearly all the great British steamship companies, by which their finest vessels are held at the disposition of the Admiralty for employment as armoured cruisers when required. Under the previous agreements only the Cunard, White Star, Peninsular and Oriental, and Canadian Pacific Railway companies were included. To these have now been added the Orient, Royal Mail and Pacific companies. Eighteen of the largest and swiftest passenger steamers belonging to these companies now receive an annual subvention, and thirty steamers in addition are held at the disposition of the Admiralty without further subsidy.

Like the English Army the Navy is manned by volunteers, and there is no compulsory service in connection with it. A large proportion of the seamen enter the service as boys. They are accepted for training-ships up to the age of eighteen, and when a boy reaches the age of eighteen his term of actual service in the Navy begins, and must last for at least twelve years. To be accepted for a training-ship, a boy between the age of fifteen and fifteen and a half must be five feet and half an inch in height, with a chest measurement of thirty and a half inches The height measurement is made without shoes. If accepted when between fifteen and a half and sixteen a boy must be five feet and one and a half inches in height, and thirty-one inches round the chest. Between sixteen and sixteen and a half a boy must be five feet two and a half inches in height, and thirty-one and a half inches round the chest.

The pay of seamen ranges from one shilling and three pence a day for ordinary seamen, to nine shillings a day for chief gunners and boatswains. Men who have put in nine years' service in the Navy can pass into the Coast Guard Service. Those who stay in the Navy for a period of twenty-two years become entitled to pensions. The amount of pension is from eighteen pounds a year, upwards, according to the rating on retiring from the ranks. The average pension for men of all ranks is £31 a year.

The Naval Reserve, as the result of changes which were made in 1901-2, is now of two branches, the Royal Naval Reserve and the Royal Fleet Reserve. The Naval Reserve is composed of men ordinarily in the merchant service, who put in a certain number of days training each year on board coast-guard ships, and who are liable to be called upon for service afloat in the event of war. The Fleet Reserve consists of men who have served twenty-two years in the Royal Navy and earned pensions, and of men who have served twelve years in the navy and have then transferred themselves to the Fleet Reserve. As with many seamen in the Royal Navy Service, for pension begins at eighteen years of age, there is always a large proportion of pensioners who are in the prime of life. Before the Fleet Reserve was established many of these men were of the Seamen Pensioner Reserve. In future in the case of men who receive pensions it will be obligatory on them to join the Fleet Reserve.

For the work of the British Navy the world is divided out into nine stations. "Except for the small squadron France keeps off Newfoundland, and for the fleets of the States of the American Continents, we alone," said Mr. Goschen, in describing the naval-stations in his speech of March 10th, 1898, "have squadrons where other nations have isolated ships. When we have to reinforce our foreign squadrons we send out fully-manned and fully-commissioned men-of-war, so that at all times, besides our squadrons, we have traversing the seas a certain number of ships in commission, ready for war, if war should occur, at any moment."

In respect to coaling-stations, as in respect to the size of the fleet, Great Britain is admittedly without a rival. On the trade route from England to the East, by way of the Suez Canal, Great Britain has coaling-stations at Gibraltar, Malta, Aden, Ceylon, Singapore, Wei-hai-wei and Hong Kong. On the older route to the East, by way of the Cape, there are British coaling-stations at Sierra Leone, St. Helena, Capetown, Mauritius. In the West Indies the coaling-stations are at Port Castries on the Island of St. Lucia, and at Port Royal, Jamaica. Bermuda and Halifax are the coaling-stations in the North Atlantic. Esquimalt is the station for the North Pacific; and in Australia the stations are on King George's Sound and on Thursday Island. Nearly all the stations are on islands, and are well defended. Gibraltar and Malta are regarded by naval experts as the only coaling-stations liable to serious attack, and they are so open to attack because both of them are within easy distance of European ports. Both of them, however, have exceptionally powerful defences.

# MILITIA AND DEFENCE OF CANADA.

Previous to the confederation of the Provinces, the defence of this country was entirely in the hands of the Imperial Government, who for that purpose maintained troops in each Province, supported by various local volunteer militia corps. This volunteer militia had, when called upon, rendered most efficient service in times of trouble.

After Confederation the British Government gradually withdrew all the Imperial troops from this country, and at present only maintain a garrison at Halifax, and a naval establishment there and on the Pacific coast.

By the British North America Act the command in chief of all naval and military forces of and in Canada was vested in the Queen, and the control of the same was placed in the hands of the Dominion Parliament. A Department of Militia and Defence was at the same time established, the first Minister being Sir George E. Cartier, and the first Militia Act was passed in 1868, 31 Vic., chap. 40. The Act was subsequently amended in various ways, but is practically embodied in the present Militia Act, 49 Vic., chap. 41 (Revised Statutes, 1886). By it the militia of Canada is declared to consist of all the male inhabitants of Canada of the age of 18 years or upwards and under 60, not exempted or disqualified by law, this population being divided into four classes, as follows:—

The first class comprises those aged 18 or upwards and under 30, being unmarried or widowers without children.

The second class comprises those between the ages of 30 and 45, being unmarried or widowers without children.

The third class comprises those between 18 and 45, being married, or widowers with children.

The fourth class comprises those between 45 and 60.

The following persons are exempt from enrolment and active service at any time: Judges, clergymen and ministers of all religious denominations, professors in colleges and teachers in religious orders, the wardens and officials of all penitentiaries and lunatic asylums, persons physically disabled, and any person being the only son of a widow and her only support. Certain other persons are exempt from service except in case of war.

The number of men to be trained and drilled annually is limited to forty thousand, except as specially authorized, and the period of drill is to be sixteen days and not less than eight days each year.

The Militia is divided into Active and Reserve land and marine force. The Active land and marine force is composed of men raised either by voluntary enlistment or by ballot, and the Reserve force consists, practically, of the whole of the efficient men not serving in the Active Militia of the time being.

The period of service is three years.

# CANADIAN TROOPS TO SOUTH AFRICA.

In the war between the combined forces of the Orange Free State and the Transvaal Republic against Great Britain, Canadian troops took an active and illustrious part with the Mother Country. No less than six contingents, comprising over 7,300 officers, non-commissioned officers and men, left Canada for the seat of hostilities. Excepting the contingent forming part of the SouthAfrican Constabulary, and whose engagement is for three years from March, 1901, the remainder of the troops, with few individual exceptions, have now returned to Canada. The war broke out on the 11th October, 1899, and peace was signed at Pretoria on the 31st May, 1902; the hostilities lasted two years and 232 days, with the result that these territories have now become part of the British possessions, and are henceforth to be designated as the Orange River Colony and the Transvaal Colony.

### SUNDRY INFORMATION.

By Army Order, 16th June, 1900, N. C. officers and men of Colonial Contingents received a gratuity of £5 when discharged medically unfit, or on account of their services being no longer required in connection with the war, or at the termination of their engagement.

The following terms when applied to wounds may be taken as conveying the signification stated against them:

"Slight." A wound likely to heal rapidly, not impairing the use of a limb or organ, and often not even entailing admission into the hospital.

"Severe." A wound requiring careful treatment in hospital, but not necessarily dangerous, often involving fractures of bone, and sometimes even the permanent impairment of a limb:

"Dangerous." A wound such as might occur from the penetration of the head, chest, abdomen, or any vital organ.

Officers appointed to the Canadian contingents were considered, while serving therein, as holding the rank to which they had been appointed, and were to be addressed officially by that rank.

Mr. T. F. Best accompanied the troops on SS. *Milwaukee*, as representative of the Y.M.C.A.

*Surg. Lt.-Col. G. S. Ryerson embarked on board the SS. *Laurentian*, as Commissioner for the Red Cross Society.

The following postal clerks embarked on board the SS. *Laurentian*, viz: Eccleston, W. R. (Lieut.), Chief in charge; Johnston, R.; Lallier, J.; Bedell, F. B.; Murray, K. A.

The Chaplains and Nurses attached to the forces sent to South Africa were accredited as Captains and Lieutenants, respectively, and received pay and allowances of those ranks.

Estates, etc., of deceased (South African Constabulary) are handed over to the Orphan Master of the Colony in which deceased was serving, for settlement with local creditors; the balance remains at disposal of next of kin or the beneficiaries under the will, if any. For information, communicate with the "Orphan Master" at Bloemfontein (in the case of members of "E" Division); and with the "Orphan Master" at Pretoria, for other divisions. Give all details possible.

# CANADIAN TEAMS TO WIMBLEDON AND BISLEY.

Canada has always been represented by a team of its best shots at the annual Prize Meeting of the National Rifle Association of England. The first matches were held in 1872, at Wimbledon, but since 1890 they take place at Bisley. The most coveted of all prizes, the Queen's (£250), was won only once by a Canadian, Pte. T. H. Hayhurst, 13th Battalion, Hamilton, Ont., in 1895. Many other important prizes have also been captured by our countrymen. The Kolopore Cup, contested for by the Mother Country and the Colonies was won six times by the Canadians: in 1872, '75, '81, '84, '89 and '96. Eight men compose the team.

Canada sends to Bisley twenty representatives to take part in the various matches open to them, and these men are selected by competition held at Ottawa under the Dominion of Canada Rifle Association. No competitor is eligible for selection who has been on the team twice or oftener during the previous four years. The first thirty on the list for the meeting of 1903 are:

# THE PALMA TROPHY.

This trophy of the United States was first put up to competition to the riflemen of the world, at Creedmore, Long Island, in September, 1876, and was incidental to the big Centennial Exhibition. It was then won by a team of the United States, against teams representing Ireland, Scotland, Australia and Canada, respectively. As a souvenir of the occasion each member of the competing teams was presented with a handsome medal. In 1877 it was again won by the United States against Great Britain. It was only in 1901 that a Canadian team competed again for it, and this time won the trophy. On the 13th of Sept., 1902, immediately after the meeting of the Dominion of Canada Rifle Association, it was again contested for, at Ottawa, by teams from Great Britain, Canada and the United States, and carried off by Great Britain. The next contest for this trophy will be held at Bisley during the summer of 1903.

The ranges are 800, 900 and 1,000 yds., 15 shots at each range; teams composed of eight men each. The scores at the shooting held 13th Sept., 1902, were as follows:—

| | Great Britain. | United States. | Canada. |
|---|---|---|---|
| 800 yds..... | 528 | 550 | 508 |
| 900 yds..... | 483 | 449 | 440 |
| 1000 yds..... | 448 | 448 | 425 |
| Total .... | 1459 | 1447 | 1373 |

# CANADIAN SCHOOL TEACHERS IN SOUTH AFRICA.

The forty lady school teachers, whose names are given below, were engaged by the Dominion Government at the request of the Imperial authorities in the spring of 1902 for educational work in the refugee camps in the Transvaal and Orange River Colonies. The selection of the number required out of the many hundred applications received was entrusted to the Educational Departments of the Provinces, but all other arrangements were made by the Honorable the Secretary of State. The teachers were divided into two parties of twenty each, the first assembling at Montreal on the 13th April and sailing from Halifax for Liverpool by the SS. *Corinthian* on the 14th, and the second meeting at St. John on the 16th and sailing from that port on the 19th of the same month by SS. *Lake Ontario*. After a short stay in England, where they were the recipients of much hospitality from a number of notable personages, the two parties sailed from Southampton on the 3rd and 10th May respectively, reaching Cape Town towards the end of the month, the arrival of the second twenty being simultaneous with the declaration of peace (May 31st, 1902). The teachers receive a salary of £100 sterling a year, and all their expenses are paid from the time they left their homes to that of their return. They are under contract to serve for one year certain, with the prospect of permanent employment for such as desire to remain in South Africa.

# POSTAL INFORMATION.

*For List of Officials of Post Office Department, see page 258.*

## Letter Rates, &c.

*Canada.*—Letters posted in Canada, addressed to any place within the Dominion, 2 cents per oz. If unpaid, such letters cannot be forwarded, but will be sent to the Dead Letter Office. If partially prepaid, the letter will be forwarded to its destination and double the deficiency charged on delivery. Letters mailed at any office for delivery at or from the same office, provided that the office is not one at which free delivery by letter carriers is established, are charged 1 cent per oz., and must be at least partially prepaid; otherwise they are sent to the Dead Letter Office. Letters of this nature mailed at and for delivery from an office at which there is a free delivery by letter carriers are liable to 2 cents per ounce. All postage must be prepaid by postage stamps.

*Post Cards.*—From any place in Canada to any place in Canada or to the United States, 1 cent each. British and Foreign, 2 cents each.

*Private Post Cards.*—The face of a Private Post Card may be used for advertisements, illustrations, etc., provided that a clear space of at least ¼ inch is left along each of the four sides of the postage stamp, and a clear space 3¼ inches long and 1½ inches wide reserved for the address at the lower right hand corner of the card. Private Post Cards must not exceed a size of 6 inches in length by 3⅝ inches in width. Cards exceeding these limits are treated as insufficiently paid letters. The words "Private Post Card" must be written or printed on the face of private post cards addressed to places outside of Canada.

*United Kingdom*, and the following British Possessions and Protectorates: Aden, Ascension, Bahama Islands, Barbados, Bermuda, British Central Africa, British East Africa, British Guiana, British Honduras, British India, British North Borneo Company's Territory (including Labuan), Cape Colony, Cayman Islands, Ceylon, China (British Postal Agencies in), viz., Amoy, Canton, Foochow, Hankow, Hoihow, Liu-Kung-Tau (Wei-Hai-Wei), Ningpo, Shanghai and Swatow; Cyprus, Falkland Islands, Fiji, Gambia, Gibraltar, Gold Coast Colony, Hong Kong, Jamaica, Johore, Lagos, Leeward Islands, Malay States, Malta, Mauritius, Natal, Newfoundland, New Zealand, Nigeria (Northern), Nigeria (Southern), Orange River Colony, Sarawak, Seychelles, Sierra Leone, Straits Settlements, St. Helena, Tobago, Transvaal Colony, Trinidad, Turks Islands, Uganda, Windward Islands, Zanzibar.—Postage on Letters, 2 cts. per half oz.

*Foreign Countries, except United States.*—Postage on Letters, 5 cents per half oz. If sent unpaid, double postage will be charged.

*United States.*—The rate on letters to the United States is the same as in Canada, and at least one rate must be prepaid.

It is very important to bear in mind that the postage upon letters for the United Kingdom and all Foreign Countries is calculated by the *half ounce* and *double* the deficient postage is charged on all unpaid or short-paid letters.

## Registration of Letters.

Persons posting letters containing value should be careful to require them to be Registered, and to obtain from the Postmaster a certificate of receipt for Registration.

The charge for Registration in addition to the Postage is, on all classes of matter, five cents.

Both the Postage charge and Registration fee should, in all cases, be prepaid by stamp.

Registration is not an absolute guarantee against the miscarriage or loss of a letter; but a Registered Letter can he traced where an Unregistered Letter can not, and the posting and delivery or non-delivery can be proven.

## Book Post, &c.

A Book Packet may contain any number of separate books. Limit of weight for domestic post, 5 lbs. (unless consisting of a single book, in which case a weight of 10 lbs. is allowed); for foreign post, 4 lbs. Limit of size, two feet in length, or one foot in width or depth.

Book packets must be open at *both ends or both sides*, and must not contain any letter or sealed inclosure.

Books for the use of the blind are free of Canada postage, and correspondence passing between blind persons in raised characters is chargeable at the rate of 1 cent per 2 ozs.

The rate on Book Packets for delivery in Canada, Great Britain, the United States and all Postal Union Countries, is 1 cent per 2 ozs.

## Miscellaneous Matter.

Miscellaneous matter, described as under, may pass between places in the Dominion of Canada upon prepayment of the rates indicated below. The regulations of the British Post Office do not admit of the transmission by mail to the United Kingdom (or other countries beyond the sea) of miscellaneous matter as such; but a great part of the matter referred to under that head may be forwarded to the United Kingdom by Book Post:—

Matter (other than newspapers and periodicals), wholly in print without reference to process, such as circulars, catalogues, calendars, hand-bills, books, pamphlets, printed forms, etc., on which the rate of postage is 1 cent for each 2 ozs. or fraction thereof. This rate applies also to indented or perforated sheets of paper containing characters which can be read by the blind. To come within this class the material printed upon must be either paper, cardboard or parchment.

Maps, prints, drawings, plans (without specifications), engravings, photographs (when not on glass or in cases containing glass), visiting cards (when printed or

engraved), sheet music (whether printed or written), official or private post cards in quantities, the manuscript of books or newspapers, whether hand-written or type-written, the following partly-printed and partly-written matter: militia and school returns, customs manifests, voters' lists, written or partly in writing, school or college examination papers, municipal assessment rolls, Dominion and Provincial Government returns on official blanks, and all partly-printed and partly-written Dominion and Provincial Government documents, statute labor returns, municipal returns in general; seeds, cuttings (but not cut flowers), bulbs, roots, bedding plants, scions or grafts, botanical, entomological and mineralogical specimens. The rate of postage on these articles is 2 cents for the first 4 ozs. or fraction thereof, and 1 cent for each additional 2 ozs.

No letter or other communication intended to serve the purpose of a letter must be sent or inclosed in any such package or thing mentioned, and the same must be sent in covers open at the ends or sides, or otherwise so put up as to admit of the contents being, if necessary, easily withdrawn for examination by the officers of the Post Office to ensure compliance with this provision (if enclosed in sealed envelopes notched at the ends or sides, or with the corners cut off, letter rate of postage will be charged).

No packet of miscellaneous matter can be transmitted by mail if it exceeds 5 lbs. in weight, 30 inches in length or 12 inches in width or depth, nor may the combined length and girth of any packet exceed 6 feet.

Legal and commercial papers generally are liable to *letter rate* of postage.

Printed or written *requests for return* are recognized on 3rd and 4th class matter, addressed to places within the Dominion, and same will be *returned direct to the sender*, subject to the payment by the sender, on delivery to him through the Post Office, of the full amount of postage to which the article was in the first place liable, together with any charges rated thereon on account of any deficiency in the original prepayment.

## Newspapers and Periodicals.

The general postage rate on newspapers and periodicals *published in Canada* not less frequently than once a month, and addressed to regular subscribers in Canada, the United States and Newfoundland, and to newsdealers in Canada, is fixed by law at ½ cent per pound. The following exception, however, is to be noted: Newspapers and periodicals published not *more* frequently than once a week and not *less* frequently than once a month, are entitled to pass free to regular subscribers and newsdealers in Canada within a circular area of 40 miles in diameter, having as centre either the place of publication or any established Post Office not more than 20 miles distant therefrom, the choice of a centre within these limits resting with the publisher; and such newspapers and periodicals are to be put up into packages and delivered into the Post Office, under such regulations as the Postmaster-General may from time to time make.

On all newspapers and periodicals posted in Canada, for delivery in the Dominion, other than those addressed to regular subscribers or news agents, from office of publication, the rate is *one cent per 4 oz.*, to be invariably prepaid by Postage Stamp.

Newspapers and periodicals weighing not more than 1 oz. each may be posted singly, if prepaid by Postage Stamp ½ cent each.

The postage on *bona fide* specimen newspapers, and on papers and periodicals published less frequently than once a month, is 1 cent per lb.

British and foreign publications may be posted by newsdealers in Canada to subscribers in Canada at the rate of 1 cent per lb. They cannot however be posted at that rate for local delivery at places where there is a free letter carrier service.

## Transient Newspapers.

Transient newspapers and periodicals include all newspapers and periodicals posted in Canada, *other than Canadian newspapers sent from the office of publication, and British and foreign newspapers posted by news agents for regular subscribers* in Canada. When addressed to any place within the Dominion, or the United States, they must be prepaid the following rates by Postage Stamp:—

If posted singly and weighing not more than 1 oz., half a cent each.

If weighing over 1 oz., one cent per four oz. or fraction of four oz.

The newspaper rate to England, whether for transient newspapers or for those sent to regular subscribers, is 1c. per 2 oz. by whatever route they may be forwarded.

## Patterns and Samples within the Dominion.

Patterns and Samples of Merchandise and Goods for sale, not exceeding 3 lbs. in weight, except samples of tea, which must not exceed 8 oz. in weight, may be posted in Canada, to be forwarded to any place within the Dominion, on prepayment by Postage Stamp of a rate of 2 cents for the first 4 ozs. and 1 cent for each additional 2 ozs., under the following regulations:

If insufficiently prepaid the packet will be forwarded charged with double the deficient postage, provided at least 1 cent is prepaid.

Packages of Samples and Patterns, addressed to any place in Canada, may be registered by affixing thereto stamps to the value of 5 cents in addition to the postage rate, and provided such packet be handed into the Post Office for registration.

Patterns or samples must be sent in covers open at the ends, so as to be easy of examination. Samples, however, of seeds, drugs, &c., which cannot be sent in open covers, may be enclosed in bags of linen, or such like material, fastened in such a manner that they may be readily opened.

The packet may bear on the *outside* the address of the sender, in addition to the address of the person for whom it may be intended; and also a trade mark or number, and the price of the sample enclosed; *inside*, there must be no enclosure but the samples or patterns themselves. The particulars, however, of the trade marks, numbers, and prices may be marked on the articles themselves instead of on the outside of the packet, at the option of the sender.

Goods sent for sale or in execution of an order, however small the quantity may be, or any article sent by one private individual to another, which are not actually trade patterns or samples, are not admissible.

Liquids, oils, etc., may be sent by mail in the Dominion if put up carefully in strict accordance with the directions given in the Postal Guide and ascertainable at any post office.

### United Kingdom, United States and Foreign Countries.

Patterns and samples of Merchandise, when addressed to places in the United Kingdom, must not exceed 5 lbs. in weight; to the United States and other foreign countries, 12 oz.; and must be prepaid by postage stamp at the following rates:—1 cent per 2 oz. or fraction of 2 oz., with a minimum prepayment of 2 cents covering a weight of 4 oz.

Samples of liquids, oils, glass, etc., are admitted as samples provided they are put up in strict accordance with the directions given in the Postal Guide.

### Useful Hints.

Register all valuable letters. Transmit money by Money Orders. Make complaints and inquiries in writing, and address the Postmaster-General at Ottawa. Preserve, and request correspondents to preserve, envelopes of missent or delayed letters. Send to the Postmaster-General envelopes of letters about which you seek information or make complaint. In addressing letters add the name of the *County* and *Province* in which the office addressed is located. Place stamp on the right hand upper corner of the address side. Put your own name and full address in or on letter, to insure return if it cannot be delivered. In affixing postage stamps moisten the envelope, *not the stamp*. When stamps are moistened the gum is apt to be removed.

### Parcel Post with the United Kingdom, Newfoundland and other British Colonies and Foreign Countries.

Closed parcels may be exchanged with the United Kingdom, Newfoundland and most foreign countries and British colonies under the following Regulations:—

1. The dimensions of a Parcel addressed to the United Kingdom must not exceed 30 inches in length or 1 foot in width or depth, nor must the combined length and girth of any parcel exceed 6 feet. The dimensions of a Parcel addressed to any country other than the United Kingdom must not exceed 2 feet in length by 1 foot in width or depth.

2. A Parcel must not contain any explosive, combustible, or dangerous articles.

3. All Parcels must be securely and substantially packed and closed.

4. Oils, liquids, etc., can only be forwarded if put up with the same security required in connection with their transmission as samples in the ordinary mails. Fragile articles should be packed with special care.

5. Each Parcel must be plainly directed, and such direction must include the name and full address of the person for whom the parcel is intended.

6. For each Parcel the sender must fill up a Customs Declaration. On this form the sender will supply an accurate statement of the contents and value of the Parcel; also the address thereof, with signature and place of abode of the sender. The Customs Declaration must be securely affixed by mucilage or paste to the parcel to which it relates.

Parcels from the United Kingdom or any other place beyond the Dominion will be liable to Canadian Custom duties, and under existing regulations must be examined for the purpose by an Officer of the Customs *in the presence of the persons addressed.*

Rates and limits of weight vary. See Postal Guide, or enquire at Post Office.

Prepayment by postage stamp is required in all cases. Parcels must be handed to the Postmaster; in no case should they be dropped into a letter box or other receptacle for mail matter.

### Fourth Class Matter.

Postage rate 2 cents per 2 ozs. or fraction thereof, to be prepaid by postage stamp. Miscellaneous articles of merchandise, including seeds, bulbs, etc., to United States, and generally all matter permitted to pass by mail in Canada, which is not of the nature of a letter, and therefore subject to letter rate of postage, nor entitled to pass as 3rd class matter, may pass as 4th class when addressed to any destination within the Dominion or the United States. Fourth class matter must be so packed or put up as to be open to examination of contents and must not exceed 5 lbs. in weight. The limit of size is 30 inches in length by 1 foot in width or depth, but the combined length and girth of any packet must in no case exceed 6 feet. When passing between Canada and the United States it will be subject to Customs regulations if liable to duty. The registration charge on 4th class matter is 5 cents in addition to postage.

A packet of 4th class matter may contain invoices and accounts, provided they relate exclusively to the contents of such packet; it is also permitted to enclose a card or slip of paper giving in a brief manner necessary directions for the identification or treatment of the article or articles contained in the packet. Care must be taken not to abuse this privilege by converting such notes or marks, designed solely for the facilitation of business between the sender and the addressee, into what might properly be called correspondence. A packet of 4th class matter containing a letter or any writing intended to serve the purpose of a letter in the ordinary sense will become liable to letter postage, and the sender will incur the penalty provided by law.

When several separate articles are enclosed in a packet of 4th class matter, there is no objection to each bearing a distinguishing number, so as to enable the sender to give directions by letter (sent of course separately and duly prepaid) respecting the several articles which the packet contains.

### Prohibited Articles.

All explosive, dangerous or destructive substances, glass bottles or glass in any form liable to break, and all matter subject to speedy decay, all obscene or immoral books, publications, pictures, etc., libellous post cards and letters the covers of which bear words of an offensive character, and letters and circulars relating to illegal lotteries or other fraudulent schemes.

### Foreign Post—Commercial Papers.

"Commercial Papers" are understood to comprise all papers or documents written or drawn wholly or partly by hand (except letters or communications of the nature of letters or other papers or documents having the character of an actual and personal correspondence), documents of legal procedure, deeds drawn up by public functionaries, copies of or extracts from deeds under private seal and (whether written or printed on stamped or unstamped paper) way bills, bills of lading, invoices and other documents of a mercantile character, documents of insurance and other public companies, all kinds of manuscript music, the manuscript of books and other literary works. The rate is 1 cent per 2 ozs., but each packet must have a minimum prepayment of 5 cents; this prepayment will cover a weight of 10 ozs. No packet must exceed 2 feet in length or 1 foot in width or depth, unless in the form of a roll, when a length of 30 inches is allowed, provided the diameter does not exceed 4 inches. The weight must not exceed 4 lbs.

# POST OFFICES AND RAILROAD STATIONS
## IN THE DOMINION OF CANADA.

*The Offices printed in Italics are authorized to grant and pay Money Orders and Postal Notes. The Offices marked * are Savings Bank Offices. Offices marked † are authorized to issue and pay Postal Notes. (The number of Post Offices, not being Money Order Offices, authorized to issue and pay Postal Notes, is being increased every month so that many Post Offices besides those now indicated by a † in the list will issue and pay Postal Notes.) Capital letters on right of the Electoral District column indicate the several Provinces of the Dominion, thus:— O, Ontario; Q, Quebec; N S, Nova Scotia; N B, New Brunswick; P E I, Prince Edward Island; M, Manitoba; B C, British Columbia; Alta, Alberta; Assa, Assiniboia; Atha, Athabasca; Sask, Saskatchewan.*

**The numbers and names placed opposite every place indicate the Railroad or Steamship line on which the place or nearest railway station is situated. See list of Railroads and Steamboats on pages 170 to 174.**

The thanks of the publishers are due to E. W. Bullinger, Esq., for his kind permission to use "Bullinger's Postal and Shipper's Guide for the United States and Canada" in the preparation of the following list:—

In the foregoing list the asterisk denotes members of the English House of Lords entitled to the designation of "Right Honourable." Barons Aylmer and de Blaquière are of the peerage of Ireland and not members of the House of Lords. The title of Baron de Longueuil existed prior to the Treaty of Paris (1763), and was duly recognized by Queen Victoria pursuant to that treaty. Sir Wilfrid Laurier and Sir Richard Cartwright are styled Right Honourable as members of the English Privy Council. Members of the Canadian Privy Council are designated above by a † and have also the title of Honourable. Judges are distinguished by a ‡ and are also by courtesy or custom Honourable. The English practice is to give the title of Knight Bachelor to members of the Judicial bench, and the Attorney and Solicitor-Generals. ** Honourable as being President of Legislative Council Nova Scotia. *** Senator; hence, honourable.

## THE GOVERNMENT DEPARTMENTS.

### THE TREASURY.

*Chancellor of the Exchequer*—Rt. Hon. C. T. Ritchie.
*First Lord of the Treasury*—Right Hon. A. J. Balfour.
*Financial Secretary to the Treasury*—W. Hayes Fisher.
*Parliamentary Secretary to the Treasury*—Sir A. Acland-Hood, Bart.
*Junior Lords of the Treasury*—H. T. Anstruther, Hon. Ailwyn E. Fellowes and W. H. Forster.

The Treasury, of which the Chancellor of the Exchequer is the political head, provides the means for meeting the charges for the military, naval, and civil services. The Parliamentary heads of each of the spending and administrative departments of the Government are responsible for the estimates for their respective departments; but it is the duty of the Chancellor of the Exchequer, with the permanent Secretary to the Treasury, to check all these estimates before they are submitted to the House of Commons in Committee of Supply. The Cabinet becomes responsible for estimates which have been submitted to Parliament, and the rejection or reduction of an estimate by the House of Commons is tantamount to a defeat of the Government. The duties which bring the Chancellor of the Exchequer most prominently before the country, are those in connection with the Budget. The first Lord of the Treasury is one of its Parliamentary heads; but the duties of the First Lord are little more than nominal, and the office is usually held by the Leader of the House of Commons. The Parliamentary Secretary to the Treasury is the official title of the Government whip in the House of Commons. The Junior Lords are his assistants. The Financial Secretary represents the Treasury in the House of Commons.

### THE FOREIGN OFFICE.

*Secretary of State for Foreign Affairs*—Marquis of Lansdowne.
*Under Secretary*—Viscount Cranborne.

All diplomatic intercourse is conducted by the Secretary of State for Foreign Affairs, who is usually of the House of Lords. The office is next in rank and importance to that of Premier, and is sometimes held in conjunction with that office. Ambassadors and consuls receive their instructions from the Foreign Office. Foreign ambassadors in London have their audiences with the Secretary of State, and he also conducts the negotiations for international treaties. The Under Secretary represents the Department in the House of Commons.

### THE COLONIAL OFFICE.

*Secretary of State for the Colonies*—Right Hon. J. Chamberlain.
*Under Secretary*—Earl of Onslow.

The Colonial Office dates back to 1660, when a Committee of the Privy Council was appointed for the Plantations, as the Colonies were then called. This Council was continued until 1768, when colonial affairs were placed under the control of a Secretary of State. When the United States secured their independence in 1783, the office of Colonial Secretary was abolished, and colonial affairs were managed from the Home Office. In 1794 the colonies were placed under the care of the Secretary at War. This arrangement was continued until 1854, when the War Department was reconstructed, and separate Secretaryships of State were established for War and for the Colonies. The colonies are divided into three classes. In the first are the Crown colonies, in which the Crown has entire control of legislation, and which are administered from the Colonial office. Hong Kong and Cyprus are examples of Crown Colonies. In the second class are the colonies with representative institutions, but not responsible government. In these the Crown has a veto on legislation and retains control of the public offices. Such colonies are Ceylon and Newfoundland. The third class includes the colonies having responsible government, such as Canada and the Australasian colonies.

### THE INDIA OFFICE.

*Secretary of State for India*—Lord George Hamilton.
*Under Secretary*—Earl Percy.

The India Office in its present form dates from 1858, when an Act of Parliament was passed which directed that all the powers and duties hitherto exercised by the old East India Company, or the old Board of Control, should in future be exercised and performed by one of His Majesty's Principal Secretaries of State. At the same time there was established a council to assist the Secretary for India. It consists of not less than ten members nominated by the Secretary. The majority of these members must be men who have served or resided ten years in India, and have not left India more than ten years previous to the date of their appointment. Members hold office for ten years, and under the direction of the Secretary for India, conduct all the business transacted in London in relation to the government of India.

### THE HOME OFFICE.

*Secretary of State for Home Affairs*—Rt. Hon. A. Akers-Douglas.
*Under Secretary*—Hon. T. H. A. E. Cochrane.

The Home Department has the control of the London police force, and also the oversight of the police forces in the counties and municipal boroughs; and, generally speaking, the Department is responsible for the internal

peace of the country. Prisons, convict establishments, criminal lunatic asylums, executions, and all matters connected with the post-judicial execution of the criminal law, come within the purview of the Home Office. It is also responsible for the administration of the factory code, and the laws relating to mining.

THE WAR OFFICE.

*Secretary of State for War*—Rt. Hon. Wm. St. John Brodrick.

*Under Secretary*—Earl of Hardwicke.

*Financial Secretary to the War Office*—Lord Stanley.

The Secretary for War has control of the army at home and abroad, and is responsible for its efficiency to the Sovereign and to Parliament. He directs all movements of troops, and all appointments made by the Commander-in-Chief are subject to his approval.

THE ADMIRALTY.

*First Lord of the Admiralty*—Earl of Selborne.

*Secretary to the Admiralty*—H. O. Arnold-Forster.

The Admiralty, which has charge of the Royal Navy, is administered by Lords Commissioners. The head of the Department, who is always of the Cabinet, is known as the First Lord of the Admiralty. The other Lords Commissioners or Junior Lords are officers without seats in Parliament, and are respectively at the heads of the departments into which the Admiralty is divided. The foreign movements of ships are at the instance of the Cabinet, the Foreign Office, and the Colonial Office, and it is from these authorities that the Lords of the Admiralty receive their orders. In time of war the orders go from the Cabinet. At other times the movements of vessels are at the instance of the Foreign Office and the Colonial Office.

THE BOARD OF EDUCATION.

*President*—Marquis of Londonderry.

*Secretary*—Sir W. R. Anson, Bart.

The Committee of Council for Education or the Education Department, as it is popularly called, exercises supervision over the various departments of state-aided education, and distributes the grants for education annually made by Parliament. These grants date from 1833; and in 1839 the Committee of Council for Education was established. The Vice-President was always of the House of Commons, and he was practically the Minister of Education. On the 1st of April, 1900, the Committee of Council for Education came to an end, and the powers it had exercised since 1839, enormously increased, however, since 1870, were transferred to a new State Department known as the Board of Education. The new Board was created under an Act of Parliament passed in the ordinary session of 1899. It consists of a President, the Principal Secretaries of State (these are the Secretaries for Foreign Affairs, for Colonial Affairs, for the Home Department, for War, and for India), the First Commissioner of the Treasury, and the Chancellor of the Exchequer. With the creation of this new Board there was for the first time a direct and general connection between the Government and secondary schools in England. Heretofore the Committee of Council had been concerned chiefly with elementary education, except as regards the Science and Art Department. Now, however, inspectors representing the Board of Education may visit the secondary schools, and a connection is established between these schools and the municipal councils. With the new Board of Education there was also created a Consultative Committee, which is to keep a register of teachers, and advise the Board on any matters referred to it. Universities and other bodies concerned in education are represented on the Consultative Committee. At the formation of the Balfour Government and the retirement of Sir J. Gorst, Vice-President, the Marquis of Londonderry became the first President of the Board and Sir W. R. Anson the first Secretary.

THE LOCAL GOVERNMENT BOARD.

*President of the Local Government Board*—Rt. Hon. W. H. Long.

*Parliamentary Secretary to the Local Government Board*—Grant Lawson.

This Department dates from the reform of the Poor Law in 1834. From 1834 to 1847 its chief was not of the Ministry nor in Parliament. Up to 1871 it was occupied exclusively with the administration of the Poor Law. In 1871 it took over from the Home Department numerous duties in connection with municipal government and public health, and its title was changed to the Local Government Board.

THE BOARD OF TRADE.

*President of the Board of Trade*—Rt. Hon. Gerald Balfour.

*Parliamentary Secretary to the Board of Trade*—A. Bonar Law, M.P.

The Board of Trade is in charge of the administration of the laws relating to limited liability companies, to bankruptcy; and it also has the oversight of all matters connected with the mercantile marine, harbours, canals, railways, and street car lines and electric lighting. The Labour Bureau is a department of the Board of Trade. Its work is confined to the collection and compilation of information of all kinds relating to labour. The Board of Trade also collects information relating to trade and commerce abroad.

THE POST OFFICE.

*Postmaster-General*—Rt. Hon. J. Austen Chamberlain.

The Post Office in England controls the telegraphs, as well as the home and foreign mail departments. The telegraphs have been a Government undertaking since 1869. The Post Office savings banks, of which there are over 12,000, receive sums up to a maximum of £50 in one year, or £200 in all. They also do a life insurance, and an annuity business on lines intended to meet the needs and convenience of the working classes.

THE BOARD OF AGRICULTURE.

*President of the Board of Agriculture*—Rt. Hon. R. W. Hanbury.

The principal duties of this Department are the administration of the laws for preventing and stamping out cattle disease. It supervises the landing of live cattle imported from abroad.

OFFICE OF PUBLIC WORKS AND BUILDINGS.

*First Commissioner of Works*—Lord Windsor.

This Department has the custody and supervision of all Royal Palaces and parks, and also of buildings such as the Houses of Parliament, the Palace at Westminster, the Law Courts, and the public offices at Whitehall.

DEPARTMENT OF THE LORD CHAMBERLAIN.

*Lord Chamberlain*—Earl of Clarendon.

*Comptroller of the Household*—Viscount Valentia.

The Lord Chamberlain's Department has the general supervision of the Royal Household "above stairs," and also various duties towards the Sovereign and the Court. It is through the Lord Chamberlain that presentations at Court are arranged. In cities where there are royal palaces, he acts as the licenser of theatres. The Examiner of Plays is in the Department of the Lord Chamberlain. His sanction is necessary for the production of a play in any theatre in England at which a charge for admission is made.

IRISH AND SCOTCH DEPARTMENTS.

*Chief Secretary for Ireland*—Rt. Hon. Geo. Wyndham.

*Secretary for Scotland*—Lord Balfour of Burleigh.

These Departments for Ireland and Scotland respectively exercise functions very similar to those of the Home Department in England.

MINISTERIAL SALARIES.

The salaries received by the members of the Cabinet range from £2,000 to £6,000. The Lord Chancellor has also £4,000 as Speaker of the House of Lords. The political secretaryships and the under secretaryships of departments have attached to them salaries of £1,500 to £2,000 a year. Pensions are granted to such of the holders of Ministerial offices as after their retirement become too straitened in means to maintain themselves in a social position in keeping with the official rank they have held. These pensions are granted irrespective of length of official service. They range in amount from £1,000 to £1,200. At the present time no pensions of this kind are being paid.

## The Supreme Court of Judicature for Ontario.

COURT OF APPEAL FOR ONTARIO.—Constituted for the hearing of appeals from the High Court of Justice, and from the County Courts. From the judgment of this Court an appeal lies, at the option of litigants, either to the Supreme Court of the Dominion, or to His Majesty in Privy Council, in cases over £1,000, or where annual rent, fee, or future rights of any amount, are affected. The Judges of this Court may be placed on the rota for the trial of Election petitions, with the Justices of the High Court, who as *ex-officio* Judges of this Court, choose from their number a Judge or Judges to sit in Appeal in case of there being a vacancy in this Court, or if, from illness or some other cause, one of the Judges of the Court is unable to be present, or is under any legal disqualification to hear an appeal. Sittings are held at such times and for such periods as the Judges shall, from time to time, deem necessary or convenient for the speedy dispatch of business, the five regular sittings being the first Tuesday in March and September, and the second Tuesday in January, May and November, due notice of the time of holding of further sittings being given. If required, a second division of the Court, consisting of Judges of the High Court, can also sit for the disposal of business.

*Chief Justice of Ontario*—Hon. Charles Moss ($6,000). *Justices of Appeal*—Hon. F. Osler, Hon. James Maclennan, Hon. J. T. Garrow, Hon. J. J. Maclaren ($5,000 each). *Registrar*– J. S. Cartwright, K.C. *Assistant Registrar*—Charles S. Grant. *Usher and Messenger*—E. Oliver.

## High Court of Justice for Ontario.

The jurisdiction of this Court extends to all manner of actions, causes and suits, criminal and civil, real, personal and mixed, within Ontario, and it may proceed in such, by such process and course as are provided by law, and as shall tend with justice and despatch to determine the same; and may hear and determine all issues of law, and also (with the inquest of twelve good and lawful men in the cases provided for) try all issues of fact, and give judgment, and award execution thereon, and also in matters which relate to the King's Revenue (including the condemnation of contraband or smuggled goods) as may be done by His Majesty's Superior Courts of Law in England, and also the like jurisdiction as the Court of Chancery in England, in cases of fraud, accident, trusts, executors, administrators,

co-partnerships, account, mortgages, awards, dower, infants, idiots, lunatics and their estates, waste, specific performance, discovery, and to prevent multiplicity of suits, and may decree the issue, repeal, or voidance of letters patent, and generally the like powers which the Court of Chancery in England possesses to administer justice in all cases in which there is no adequate remedy at law.

Divisional Court sittings are held on the first Monday of each month (except vacation) to dispose of such matters as may properly be brought before a Divisional Court.

LAW CIRCUITS.—*Sittings for Hearing of Actions.*—In the Counties of York, Wentworth, Carleton and Middlesex, there is held an additional such Court in every year, in the vacation between Michaelmas and Hilary Terms; and in the County of York there is held another such Court, between Easter Term and the first day of July. Whenever in any year the judges may determine that it is not necessary to hold the latter such sittings may be dispensed with. The sittings for hearing of actions may, in the discretion of the Judges, be held separate and apart from the Courts of Oyer and Terminer, and General Gaol Delivery.

The Courts in each Circuit are presided over by the Chancellor or by a retired or present Justice of the High Court or of the Court of Appeal, or by a Judge of a County Court, or by some one of His Majesty's Counsel learned in the law, requested by the Chancellor or one of the Justices to act in that behalf.

WEEKLY SITTINGS.—A Judge sits at Osgoode Hall every week except vacation for the purpose of disposing of all business except trials which may be transacted by a single Judge. Chamber business on Mondays and Fridays. Court business on Tuesdays, Wednesdays and Thursdays. Sittings will be held at Ottawa and London respectively at least one day in each week (except vacation) to dispose of certain matters which can be determined by a single Judge. The Judges have now power on petition to constitute monthly or semi-monthly sittings in lieu of weekly.

CHAMBERS.—Chambers are held each day for such business relating to actions as may be transacted by a single judge out of Court. The Master in Chambers is empowered to obtain the assistance of any Official Referee to sit with or for him.

LONG VACATION extends from the 1st of July to the 31st of August, both inclusive. There is also a vacation from the 24th December to 6th January, both inclusive.

HEIR AND DEVISEE COURT.—Commissioners, the Judges of the Superior Courts, and such other persons as may be appointed by commission under the Great Seal. Their duties are to determine claims to land in Ontario, for which no patent has issued from the Crown in favor of the proper claimants, whether as heirs, devisees, or assignees. Sittings at Toronto, first Monday in January and July in each year. *Judges*—The Judges of the Superior Court (*ex-officio*), others appointed by commission.

COURTS FOR THE TRIAL OF CONTROVERTED ELECTIONS.—The nature of these courts is sufficiently indicated in their title. In respect to elections for the House of Commons of Canada, the Superior Courts by one of their Judges appointed in that behalf, are invested with special jurisdiction for the trial of contested elections, and appeals lie to the Supreme Court at Ottawa. In respect to elections for the Local Legislature of Ontario, the Judges of the Supreme Court of Judicature meet annually on or before the third day of Michaelmas sittings and severally elect, by a majority of votes, a Judge from their respective Courts or Division to be placed on the rota for the trial of election petitions during the ensuing year. In the case of death or the illness of a Judge so chosen, the Court of which he is a member meet and elect another Judge. Trials involving corrupt practices are presided over by two Judges, otherwise a single Judge presides, and an appeal lies to the Court of Appeal of the Province.

An appeal lies to a Divisional Court.

County Court Sittings and Court of General Sessions.—The County Judge in each county holds a sitting of his Court and a Court of General Sessions in his county, for the trial of issues of fact, semi-annually on the second Tuesday in June and December, except in the County of York, in which county said Court is held four times, commencing on the first Tuesday in December and March, and the second Tuesday in May and September, the latter Courts for the trial of cases of felony and misdemeanor, but treason and capital felonies are exempted from their jurisdiction, and (except in the County of York) a sitting for the trial of issues without a jury shall be held in each county on the first Tuesday in April and October in each year. The Judge may also, in his discretion, hold additional sittings at such times as may be deemed expedient to expedite business, but only for the trial of issues of fact without a jury.

County Judge's Criminal Court.—Persons committed to jail for trial, on charge of being guilty of any offence for which they may be tried at a Court of General Sessions *may, with their own consent*, and subject to the provisions of the Act in that behalf, be forthwith tried by the Judge of the County Court and General Sessions without a jury, and if convicted, be sentenced by said Judge; and the Judge sitting on any such trial for all the purposes thereof, is constituted a Court of Record, and the record in any such case shall be filed among the records of the Court of General Sessions last mentioned.

County Court Terms.—The several County Courts in Ontario hold four sittings in each year, commencing respectively on the second Monday in the month of January, and the first Monday in the months of April, July, and October, except the County of York, which commences on the first Monday in April, and the second Monday in January, June and October, and ending on the Saturday of the same week, unless extended by order of the Judge.

Courts of Revision.—The County Judges hold annually Courts of final revision of the Assessment Rolls of each Municipality, being in the light of Courts of Appeal from the first Court of Revision held by the Municipality; and also Courts for the Revision of the Voters' Lists for Provincial Elections.

Surrogate Courts.—The jurisdiction of these Courts relates to all testamentary matters and causes, and to the granting and revoking of probate of wills, and letters of administration of the effects of deceased persons having estate or effect in Ontario, and all matters arising out of or connected with the grant or revocation of probate or administration, subject to an appeal to the Chancery Division. The County Judges are also Judges of the Surrogate Courts.

Division Courts are held for the summary disposal of cases by the presiding Judge, being the County Judge or his Deputy, or any Barrister appointed to hold the same; but a jury of five persons may be demanded in certain cases. Their jurisdiction extends to actions of debt or contract where the balance claimed is over $100 and under $200 and the original amount was ascertained by the signature of the defendant, and to $100 in other cases of debt, subject in some cases to an appeal to the Court of Appeal; but the sum of the account to be gone into cannot exceed $400; injuries or torts to personal chattels amounting to $60; and personal actions to that amount, if not excepted from their jurisdiction; but not to actions for gambling debts, liquor drunk in a tavern, or notes of hand given therefor, ejectment, title to land, &c., or any toll, custom or franchise, will or settlement, malicious prosecution, libel, slander, crim. con., seduction or breach of promise, or actions against a J. P. for anything done by him in the execution of his office, if he objects to it. Each Judicial District is divided into Court Divisions, and Courts are held once in two months in each Division, or oftener at the discretion of the Judge. The Divisions are established by the Courts of General Sessions, and in certain cases by the Judges.

# THE LAW OF INTESTATES ESTATES.

## DESCENT AND DISTRIBUTION OF PROPERTY.

As to all persons who died before the first day of January, 1852, the rules of descent are substantially the same as in England at that date.

Real estate of persons who died intestate (*i.e.*, who have left no will) after that date and prior to the first day of July, 1886, descends first to lineal descendants and those claiming by or under them *per stirpes*, second to father, third to mother, and fourth to collateral relatives, subject to certain rules and regulations prescribed in the statute.

The surplus personal estate of intestates who died prior to the first day of July, 1886, is, after the expiration of one full year from the death of the intestate, to be distributed in the following manner: One-third shall go to the widow of the intestate, and the residue in equal proportions to his children, or if dead, to their lineal descendants; if there are no children or legal representatives subsisting, then where the net value of the real and personal estate does not exceed $1,000, same belongs absolutely to the widow, and as to any excess over and above said amount after payments of debts, etc., the widow takes a moiety, and the other moiety goes to the next of kindred, in equal degree, and their representatives; if no widow, all to children; if neither widow nor children, all to next of kin, in equal degree, and their representatives. But no representation is admitted among collaterals further than children of intestate's brothers and sisters.

All real and personal property of persons dying on or after the 1st day of July, 1886, devolves upon and becomes vested in the legal personal representatives for the period of a year (which may be extended in a prescribed manner) subject to the payment of debts and to the effectual dispositions of deceased. The real and personal property of a married woman, in respect of which she has died intestate, shall be distributed as follows: One-third to her husband, if she leaves issue, and one-half if she leaves none, and subject thereto, shall go as if her husband had predeceased her. The realty and personalty comprised in a residuary devise or bequest is (unless the will otherwise directs) applicable ratably according to their respective value to the payment of the debts.

TABLE SHOWING THE DISTRIBUTION OF PERSONAL PROPERTY OF INTESTATES IN ONTARIO SINCE JULY 1ST, 1886.

| Wife only | Net value of estate not exceeding $1,000 to wife absolutely. Excess over $1,000, half to wife; and half to next of kin, in equal degree to intestate, or their legal representatives, or if no next of kin, to the Crown. |
| No wife or child | All to the next of kin, and to their legal representatives. |
| Child, children or their representatives | All to him, her or them. |

The insane, classified according to civil condition, were: single, 9,506; married, 2,815; widowed, 721; unknown, 313.

## COINAGE IN CANADA.

In the early days all sorts of coin were used in British North America.

The first step taken in Canada for a revision of currency was in 1795, when, to remedy the evils resulting from the coined money in circulation being reduced in weight, debased in value and composed of every variety of pieces peculiar to all countries trading with this continent, an Act was passed which fixed a standard of value founded upon the average intrinsic worth of the gold and silver coins of Great Britain, Portugal, Spain, France and the United States.

Subsequently various Acts of the Legislatures established a valuation for these pieces, at which they were accepted in market overt.

Finally, in 1858, the Province of Canada adopted dollars and cents, pounds, shillings and pence as the only moneys of account. In 1871 the Federal Parliament passed the Act (Chap. 4, Acts of 1871) respecting the currency, which gave to the provinces of the Dominion a uniform currency, the single gold standard adopted being that of the British sovereign of the weight and fineness prescribed by the laws of the United Kingdom, to pass current at $4.86\frac{2}{3}$. Provision was also made that, until otherwise ordered by Her Majesty's proclamation, the gold eagle of the United States, of the fixed weight of 10 pennyweights and 18 grains troy, and of a settled standard of fineness, should be legal tender in Canada. The same Act provided for a gold coinage for Canada, but special Canadian gold coinage has not yet (1902) been minted.

Silver coins were made legal tender to $10, and bronze coin to 25 cents.

The silver coins in use are 50, 25, 20, 10 and 5 cents.

## Collegiate Institutes and High Schools.

Each of the High Schools (which form the intermediate link between the Public Schools and the Universities) is managed by a Board of Trustees, appointed jointly by the County and Town Councils. In cities the Trustees are all appointed by the City Councils, except where there is only one school in the County. The Principal must be a graduate of a British or Colonial University, and certified as experienced in teaching. Assistants must also have received the prescribed training. Besides fees, local rates must be raised. Every High School with two qualified teachers receives a fixed amount of $400, and also a certain sum on salaries of teachers, general equipment, suitability of school premises and attendance. High Schools which have an average attendance of 60 pupils, may be made Collegiate Institutes, and receive additional grant. Pupils attending these schools are prepared for Matriculation in the Universities. There were 38 Collegiate Institutes and 94 High Schools, with 22,523 pupils, in Ontario in 1901.

## Public Schools.

Each Township is divided into School Sections of a suitable extent for one School; and in each of these Sections three Trustees are elected to manage its School affairs. In Cities, Towns and Villages, the Schools are managed by a Board of School Trustees elected from the Municipality.

## Educational Museum.

Connected with the Education Department is a Museum, containing specimens of school apparatus and furniture, a valuable collection of Italian, Dutch and Flemish Oil Paintings, and Statuary casts and busts. Here also is the largest collection of archæological material in the Dominion, chiefly illustrative of Ontario, and of North America. David Boyle, Archæologist. The Museum is freely open to the public from 9 a.m. to 5 p.m.

## ONTARIO EDUCATIONAL SYSTEM.

Subject to the approval of the Provincial Government all regulations for the public and high schools are made by the Minister of Education. These schools are under the control of local boards of trustees, elected by the ratepayers, and are allowed to have none but certificated teachers. Education of children between the ages of seven and thirteen is compulsory for not less than one hundred days in the year. Some of the noteworthy features in Ontario's system of education are: uniform course of study for all schools; all public and high schools in the hands of professionally trained teachers; provincial instead of local control of examination of teachers; uniformity of text-books and common matriculation for admission to all universities and learned professions. These give unity to the system, which includes (*a*) Kindergarten, (*b*) Public or Separate Schools, (*c*) High Schools or Collegiate Institutes, (*d*) the University.

### Synopsis of Fishery Laws.

Net fishing of any kind is prohibited in public waters, except under Leases or Licenses. The size of nets is regulated so as to prevent the killing of young fish. Nets cannot be set or seines used so as to bar channels or bays. A general weekly Close-time is provided in addition to special close seasons. The use of Explosive or Poisonous substances for catching or killing fish is illegal. The use of fire-arms for killing fish is prohibited. Mill-dams must be provided with efficient fish passes.

The above enactments and close seasons are supplemented in special cases, under authority of the *Dominion Fisheries Act* (Chap. 95 R. S.), by a total prohibition of fishing for stated periods. All communications relating to Fisheries should be addressed: Department of Marine and Fisheries, Ottawa.

## THE ONTARIO SUCCESSION DUTY ACT.

The Succession Duty Act, Revised Statutes of Ontario, 1897, Chapter 24, applies to the estates of persons dying on or after 1st July, 1892, and applies to real and personal property of every description except:

(1) Where the value of the estate after payment of all debts and expenses of administration does not exceed $10,000.

(2) To property given for religious, charitable or educational purposes.

(3) Property passing to or for the use of father, mother, husband, wife, child, grandchild, daughter-in-law or son-in-law of the deceased where the aggregate value of the property of the deceased does not exceed $100,000.

The Act applies:

*(a)* To all property passing either by Will or intestacy within Ontario, whether the deceased was domiciled in Ontario at the time of his death or elsewhere.

*(b)* To all said property which shall be voluntarily transferred by deed, sale or gift made in contemplation of the death of the grantor or intended to take effect after such death to any person in trust or otherwise.

*(c)* To any property taken as a *donatio mortis causa* made by any person dying on or after 7th April, 1896, or taken under the disposition made by any person so dying purporting to operate as an immediate gift whether by way of transfer, delivery, declaration of trust or otherwise which shall not have been *bona fide* made twelve months before the death of the deceased.

*(d)* To any property which the person dying on or after 7th April, 1896, having been absolutely entitled thereto has caused to be transferred or vested in himself and any other person jointly so that the beneficial interest therein, or in some part thereof, passes or accrues by survivorship on his death to such other person.

*(e)* To property passing under settlement, as to which see the Act.

*(f)* To the beneficial interest arising by survivorship or otherwise (if any) from Annuities.

Where the aggregate value of the property of deceased exceeds $100,000 and passes in whole or in part to or for the benefit of the father, mother, husband, wife, child, grandchild or other lineal descendant or daughter-in-law or son-in-law of the deceased, the same shall be subject to a duty of $2.50 for every $100 of the value.

Where the aggregate value of said property exceeds $200,000 the whole shall be subject to a duty of $5 for every $100.

## The Law Society of Ontario.

The Law Society was first established in 1797, by the Act 37, Geo. III., c. 13, which enabled the then practitioners of the law to form themselves into a society, and make rules for its government. By the Act of 1822, 2 Geo. IV., c. 5, "the Treasurers and Benchers of the Law Society" were formally incorporated; and under these and other statutes the Society has continued to be governed by a Board of Benchers, in the same manner as the various Law Societies of England. Under Revised Statutes of Ontario, c. 145, 1887, the Benchers are, exclusive of *ex-officio* members, elected by the Bar, the *ex-officio* consisting of the Attorney-General of the Dominion for the time being, if a member of the Bar of Ontario, and all members of the Bar of Ontario who have at any time held the office of Attorney-General of the Dominion or of Ontario, or of Attorney or Solicitor-General of the former Province of Upper Canada, and any retired Judge of the Superior Courts of Law or Equity of Ontario; the *elected*, thirty in number, being chosen by ballot, for a term of five years, by the members of the Bar, in manner prescribed by the Act. Vacancies during the term are filled by the remaining Benchers. On the first day of Easter Term, annually, the Benchers appoint one of their body to be Treasurer, who is also President of the Society. The Benchers sit in Convocation every term for the call of Barristers, the admission of Attorneys and Solicitors to Practice, and of Students to enter the Society, the fees paid by whom form the revenue of the Society. Osgoode Hall, appropriately named after the first Chief Justice, is the Ontario "Inn of Court," or headquarters of the Society, in which is provided accommodation for the Court of Appeal and Courts of Equity, and for the sittings in term of the Superior Courts; with a valuable and extensive library.

# LIFE INSURANCE.

The Dominion Government requires all life insurance companies doing business in Canada to make up, under oath, and deposit with the Superintendent of Insurance within two months after the close of the year, in the form prescribed by law, a statement of their affairs. These statements are subsequently verified by the Superintendent of Insurance, by personal examination at the company's chief offices, and embodied in an annual report to Parliament. The business of life insurance may be said to be wholly transacted by companies authorized by the Dominion Government, there being but one or two institutions incorporated by provincial legislation.

In 1901 there were 37 companies operating in Canada, as follows:

| | |
|---|---|
| Canadian companies | 18 |
| British " | 9 |
| American " | 10 |
| | —37 |

The new business transacted in 1901 was $73,899,228, distributed as follows:—

Canadian Companies, $38,298,747, or 52% of the whole.
British " 3,059,043, " 4% " "
American " 32,541,438, " 44% " "

The amount taken by native companies exceeded that taken by the British and American together by $2,698,266.

The total amount of insurance in force December 31st, 1901, was $463,769,034 (or over five times what it was at the close of 1880), allocated as follows:—

Canadian Companies, $284,684,621, or 61% of the whole.
British " 40,216,186, " 9% " "
American " 138,868,227, " 30% " "

Formerly the American companies held the foremost place, but for many years they have been obliged to give way to the energetic enterprise of the home companies, whose total business now exceeds that of the American companies twice over.

In 1901 the combined Life Companies received $15,189,854 in premiums, distributed thus:

Canadian Companies, $9,133,890, or 60% of the whole.
British " 1,346,666, " 9% " "
American " 4,709,298, " 31% " "

while the total amount paid to policy-holders was $8,993,125.

The figures in the following table are taken from the latest Government returns, being for the year ending December 31st, 1901:

It is not to be inferred that these figures alone should be a guide in the selection of a company to insure in, inasmuch as they do not represent the *summum bonum* of any company, but are given simply to enable the reader to obtain an idea of the business transacted by some of the principal companies operating in Canada. In selecting a company in which to insure, the main points to be observed are:

(1) Its financial strength, to be tested by a comparison of the assets with the liabilities;

(2) An examination of the profit-earning power of the company;

(3) Of its expense ratio;

(4) Of its premium rates;

(5) Of the conditions and privileges of its policy contract, etc.

The death-rate of the active companies for the last eight years, is as follows:—

| Year. | Death-rate per 1000. | Year. | Death-rate per 1000. |
|---|---|---|---|
| 1901 | 11.213 | 1897 | 10.907 |
| 1900 | 11.226 | 1896 | 10.095 |
| 1899 | 10.733 | 1895 | 11.166 |
| 1898 | 10.549 | 1894 | 10.327 |

### PLANS OF INSURANCE.

Policies are divided into two main classes, ordinary life and endowment. The life policy is payable at death only, the endowment at the end of a specified period (usually 10, 15, 20 or 25 years), or at death, if that should occur sooner. The life policy is usually secured for protection for the family, while the endowment policy fulfils a double object, viz.: provision for the family in case of death within the endowment term, and a competency to the insured should he survive the period. The life policy may be secured with premiums payable each year that the life enters upon, or, which is more preferable and popular at the present time, by a limited number of payments; for example, a twenty-payment life, after running for twenty years, is paid up, but the insurance is not payable until death. Similarly, fifteen and ten-payment life policies are paid up after fifteen and ten annual payments respectively, but are not payable until death.

The endowment policy is generally secured by annual premiums payable for the same number of years as the endowment term, but this policy is sometimes written with premiums payable only through a portion of the term. For example, a twenty-year endowment by ten payments is a policy payable twenty years hence, or at prior death, with payment of premiums limited to the first ten years of the policy.

The premium rates of most of the representative Canadian life insurance companies are uniform at all ages for the principal plans of insurance. The rates of the American companies are invariably higher than those of Canadian companies.

### AMENDMENT TO INSURANCE ACT.

The amendment to the Insurance Act, which was made at the 1899 session of the Dominion Parliament, among other matters, provides for these important changes:—

(1) For the extension and uniformity of the powers of investing the funds of Canadian life insurance companies, and

(2) That the interest basis of Reserves shall be as follows: for all new business transacted after January 1st, 1900, 3½ per cent.; for business existing as at January 1st, 1900, 4½ per cent., until January 1st, 1910, after which date the rate is to be 4 per cent. until January 1st, 1915, and thereafter 3½ per cent.

As a result of the more stringent 3½ per cent. valuation, the life insurance companies were obliged to increase their rates on January 1st, 1900.

### SURRENDER VALUES AND DIVIDENDS.

Cash values, or paid-up values, are usually allowed upon surrender of life or endowment policies, after three or more annual premiums have been paid. It has now become very general to endorse upon the policy the amount of these values. On policies taken out on the with-profit system, dividends are apportioned either annually, quinquennially, or accumulated for a period of ten, fifteen or twenty years, known as the Tontine, Reserve Dividend or Accumulative Period. The dividends to those who survive this period are increased by the dividends of those who drop out—by death, lapse, surrender, etc.—within it.

# THE ROYAL MILITARY COLLEGE

THERE are few national institutions of more value and interest to the country than the Royal Military College at Kingston. At the same time its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government institution, designed primarily for the purpose of giving the highest technical instructions in all branches of military science to cadets and officers of Canadian Militia. In fact it is intended to take the place in Canada of the English Woolwich and Sandhurst and the American West Point.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and in addition there is a complete staff of professors for the civil subjects which form such a large proportion of the College course.

Whilst the College is organized on a strictly military basis, the cadets receive in addition to their military studies a thoroughly practical, scientific and sound training in all subjects that are essential to a high and general modern education.

The course in mathematics is very complete, and a thorough grounding is given in the subjects of Civil Engineering, Civil and Hydrographic Surveying, Physics, Chemistry, French and English.

The object of the College course is thus to give the cadets a training which shall thoroughly equip them for either a military or civil career.

The strict discipline maintained at the College is one of the most valuable features of the system. As a result of it young men acquire habits of obedience and self-control, and consequently of self-reliance and command, as well as experience in controlling and handling their fellows.

In addition the constant practice of gymnastics, drills and outdoor exercises of all kinds, ensures good health and fine physical condition.

An experienced medical officer is in attendance at the College daily.

Five commissions in the Imperial regular army are annually awarded as prizes to the cadets.

The length of course is three years, in three terms of $9\frac{1}{2}$ months' residence each.

The total cost of the three years' course, including board, uniforms, instructional material, and all extras, is from $750 to $800.

The annual competitive examination for admission to the College will take place at the headquarters of the several military districts in which candidates reside, in May of each year.

For full particulars of this examination, or for any other information, application should be made as soon as possible to the Adjutant General of Militia, Ottawa, Ont.

"BARRIE AT HIS BEST"

**The Little White Bird**

—BY—

J. M. BARRIE

The repetition of the phrase "Barrie at his best" becomes almost amusing as one glances over the columns of review matter. The story is tender, fanciful, poetic, with a range of humor and pathos for which even Mr. Barrie has not prepared his readers.

---

**Flower O' the Corn**

—BY—

S. R. CROCKETT

"Mr. Crockett's public will rank 'Flower O' the Corn' amongst his most successful books. The love-story of Frances Wellwood and Maurice Raith is a gracious and tender romance."—*British Weekly.*

---

**Cecilia . . . . . .**

—BY—

F. MARION CRAWFORD

A strong and interesting novel, in which the dominating love-story has a plot so strange and new that it will be compared with the author's first and most popular work, "Mr. Isaacs."

---

**Belshazzar . . . . . .**

—BY—

W. S. DAVIS

"A SUPERBLY DRAMATIC NOVEL"

Mr. Davis has here woven a most enthralling tale about the story of the dread writing on the wall at the feast of Belshazzar which foretold the doom of the Babylonian king.

# DONOVAN PASHA

*By SIR GILBERT PARKER. With Colored Frontispiece, $1.50.*

A graceful "foreword" in this book prepares the way for as charming a series of Egyptian stories as the most fastidious reader could desire. As he wrote of Canada and Australia so now Sir Gilbert writes of Egypt and its neighborhood. With sympathy and with cunning he tells of "the life there, so full of splendour and of primitive simplicity; of mystery and guilt; of the high elements of true democracy; and the shameful practices of a false autocracy; all touched off by the majesty of an ancient charm, the nobility of the remotest history."

### SONG OF THE SAKKIA

(WATER-WHEEL).

"Turn, O Sakkia, turn to the right, and turn to the left,
The Nile floweth by night and the balasses are filled at dawn—
The maid of the village shall bear to thy bed the dewy grey goolah at dawn—
Turn, O Sakkia."

"The most popular of living Canadian authors is undoubtedly Sir Gilbert Parker."
—*Montreal Star.*

"His ability to seize the dominating mood of a landscape, to portray the more elemental as well as the conventional traits of a people, the author of these stories has conclusively proved."—*Toronto Globe.*

The Critics are of one voice concerning

# CHARLES G. D. ROBERTS

"No writer of his school excels Mr. Roberts in woodcraft, or leads us more surely and unweariedly back to the old kinship of the earth."—*Toronto Globe.*

"Mr. Roberts, who has achieved his widest success with 'Kindred of the Wild,' has for several years now been a resident of New York. He has been a diligent member of the authors' profession, turning his hand with facility to many tasks, from history and fiction to guide-books and editorials. But his best work, perhaps, is in his treatment of nature and animal life."—*The Reader.*

"Mr. Roberts has an exquisite sense of the artistic and poetical. He knows his values perfectly and he applies them with rare delicacy."—*Current Literature.*

"There is a purity and freshness about his 'Heart of the Ancient Wood'—a matchless charm not elsewhere to be found in the literature of to-day. One will not easily forget 'the watchers on the trail' in the first chapter of this book."—*Canadian Book Notes.*

## BARBARA LADD

By C. G. D. ROBERTS. Illustrations in tints and silhouette picture of the heroine on the cover. $1.25.

"Every page bears the mark of an intense love for forest and field and for the animals that dwell therein."—*Montreal Herald.*

Mr. William S. Davis, the author of "Belshazzar" says: "*'Barbara Ladd' is a story of singular beauty, purity and sweetness.*"

"The charm of the novel, however, is not so much in the plot as in the manner, in the style and characters. *Barbara herself is a girl whom you cannot read of without regretting that you never have seen her.*"—*Toronto News.*

## KINDRED OF THE WILD

By C. G. D. ROBERTS. A Book of Animal Life. Over 50 Illustrations. $2.00.

"Only a secondary feature of the book is the series of wonderful drawings by Charles Livingston Bull. Over fifty full-page illustrations in wash of striking power and originality, besides minor pen and ink drawings, beautify the volume."—*Toronto Globe.*

"There is not a dull page in the entire book. Every line is replete with interest. Of its kind no better book has been produced, and Canadians should be proud to own Roberts as a fellow countryman."—*British Whig.*

"*Like a breath of the forest put into articulate speech.*"—*Brooklyn Eagle.*
